

Maharashtra Public Service Commission Assessment

Question Paper Name :	Assistant Professor 03rd Nov 2025 Shift 1
Subject Name :	Assistant Professor
Creation Date :	2025-11-03 11:44:13
Duration :	60
Share Answer Key With Delivery Engine :	No
Actual Answer Key :	Yes

Assistant Professor

Group Number :	1
Group Id :	1505612
Group Maximum Duration :	0
Group Minimum Duration :	60
Show Attended Group? :	No
Edit Attended Group? :	No
Break time :	0

Assistant Professor

Section Id :	1505612
Section Number :	1
Section type :	Online
Mandatory or Optional :	Mandatory
Number of Questions :	100
Number of Questions to be attempted :	100
Maximum Instruction Time :	0
Sub-Section Number :	1

Sub-Section Id :

1505613

Question Shuffling Allowed :

Yes

Question Number : 1 Question Id : 150561101 Question Type : MCQ Option Shuffling : No

Bioavailability of poorly soluble BCS Class II drugs is improved primarily by _____.

Options :

1. Adding sweeteners
2. Changing colorants
3. Particle size reduction and salt formation
4. Using lubricants

Question Number : 2 Question Id : 150561102 Question Type : MCQ Option Shuffling : No

According to Raoult's law, the partial vapor pressure of each volatile constituent in an ideal solution is equal to _____.

Options :

1. Mole fraction in the solution $\times$ Molar mass of solute
2. Mole fraction in the solution $\times$ Vapor pressure of pure constituent

3. Mole fraction in the solution $\times$ Boiling point elevation
4. Mole fraction in the solution $\times$ Osmotic pressure

Question Number : 3 Question Id : 150561103 Question Type : MCQ Option Shuffling : No

Granules that are too dry tends to which of the following process problem in tablet manufacturing ?

Options :

1. Capping
2. Cracking
3. Chipping
4. Mottling

Question Number : 4 Question Id : 150561104 Question Type : MCQ Option Shuffling : No

Glass is used in Pharmaceutical packaging. According to the USP, borosilicate glass is classified in which type of glass ?

Options :

1. Type I glass

2. Type II glass
3. Type III glass
4. Non-parental glass

Question Number : 5 Question Id : 150561105 Question Type : MCQ Option Shuffling : No

Liposomes are composed of small vesicles of a bilayer of phospholipid encapsulating an aqueous space ranging from about _____.

Options :

1. 0.03 to 10 mm in diameter
2. 0.01 to 1.0 mm in diameter
3. 0.05 to 50 mm in diameter
4. 0.05 to 5 mm in diameter

Question Number : 6 Question Id : 150561106 Question Type : MCQ Option Shuffling : No

Particle sizes in topical aerosols ranges _____.

Options :

1. 10 – 50 μm

2. 0.5 – 23 μm
3. 0.1 – 0.5 μm
4. 50 – 100 μm

Question Number : 7 Question Id : 150561107 Question Type : MCQ Option Shuffling : No

In what proportion should 20% benzocaine ointment be mixed with an ointment base to produce 2.5% benzocaine ointment ?

Options :

1. 5 parts of 20% benzocaine ointment and 10 parts of ointment base
2. 2.5 parts of 20% benzocaine ointment and 17.5 parts of ointment base
3. 2.5 parts of 20% benzocaine ointment and 20 parts of ointment base
4. 5 parts of 20% benzocaine ointment and 17.5 parts of ointment base

Question Number : 8 Question Id : 150561108 Question Type : MCQ Option Shuffling : No

Certain suspensions with a high percentage of dispersed solids exhibit an increase in resistance to flow with increasing rates of shear, such systems are termed as _____.

Options :

1. pseudoplastic
2. dilatant
3. plastic
4. thixotropic

Question Number : 9 Question Id : 150561109 Question Type : MCQ Option Shuffling : No

What is the normal plasma concentration of α -Acid Glycoprotein (AAG) in humans ?

Options :

1. 0.6 – 0.8 g/L
2. 1.5 – 2.0 g/L
3. 4.5 – 6.0 g/L
4. 2.5 – 3.5 g/L

Question Number : 10 Question Id : 150561110 Question Type : MCQ Option Shuffling : No

How many grams of sugar will be required to prepare one litre of syrup USP (which is 85% w/v) ?

Options :

1. 8.5 g
2. 0.85 g
3. 850 g
4. 85 g

Question Number : 11 Question Id : 150561111 Question Type : MCQ Option Shuffling : No

The reaction of Grignard reagent with aldehyde and Ketones gives alcohol. This is known as _____ reaction.

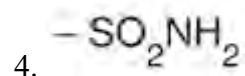

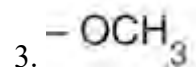

Options :

1. Electrophilic addition
2. Electrophilic substitution
3. Nucleophilic substitution
4. Nucleophilic addition

Question Number : 12 Question Id : 150561112 Question Type : MCQ Option Shuffling : No

The essential functional group in sulphonamides for antibacterial action is _____.

Options :

Question Number : 13 Question Id : 150561113 Question Type : MCQ Option Shuffling : No

Half life of Radioactive compound can be calculated by (Note : λ is disintegration constant) _____.

Options :

1. $t_{1/2} = 1/\lambda$

2. $t_{1/2} = 0.693/\lambda$

3. $t_{1/2} = \lambda/2.303$

4. $t_{1/2} = 1/2\lambda$

Question Number : 14 Question Id : 150561114 Question Type : MCQ Option Shuffling : No

Match the following inorganic compounds with their uses :

- | | |
|------------------------|------------------------------------|
| A. Aluminium phosphate | I. Radio-opaque |
| B. Sodium thiosulphate | II. Antacid |
| C. Barium sulphate | III. Desensitising agent |
| D. Strontium chloride | IV. Antidote for cyanide poisoning |

Options :

1. A – II B – IV C – I D – III
2. A – I B – II C – III D – IV
3. A – II B – III C – IV D – I
4. A – III B – IV C – I D – II

Question Number : 15 Question Id : 150561115 Question Type : MCQ Option Shuffling : No

Codein differs from morphine structurally in _____,

Options :

1. Methylation of phenolic hydroxy group
2. Oxidation of phenolic hydroxy group
3. Methylation of alcoholic group

4. Methylation of nitrogen group

Question Number : 16 Question Id : 150561116 Question Type : MCQ Option Shuffling : No

Conversion of aldehyde into hydrocarbon by the action of hydrazine and strong base is an example of _____.

Options :

1. Wolff – Kishner reduction
2. Clemmensen reduction
3. Cannizzaro reaction
4. Crossed Cannizzaro reaction

Question Number : 17 Question Id : 150561117 Question Type : MCQ Option Shuffling : No

Rate limiting enzyme of glycolysis _____.

Options :

1. Hexokinase
2. Phosphofructokinase
3. Pyruvate kinase

4. Aldolase

Question Number : 18 Question Id : 150561118 Question Type : MCQ Option Shuffling : No

The rate limiting step in steroid hormone biosynthesis is _____.

Options :

1. Conversion of cholesterol to pregnenolone
2. Conversion of pregnenolone to progesterone
3. Conversion of androstendione to estrone
4. Conversion of cholesterol to progestin

Question Number : 19 Question Id : 150561119 Question Type : MCQ Option Shuffling : No

Which of the following is the correct SAR feature of 1, 4-dihydropyridines used in cardiovascular disorders ?

Options :

1. The presence of – OH group at paraposition increases lipophilicity
2. Isopropyl substitution on amino group increases Ca^{2+} channel blocking activity
3. Removal of – OH group in the phenyl ring decreases receptor activity

4. An aromatic OR heteroaromatic C_4 – substituent essential for activity

Question Number : 20 Question Id : 150561120 Question Type : MCQ Option Shuffling : No

Mesomeric effect is the polarity produced in a molecule as a result of _____.

Options :

1. Higher electronegativity of one atom compared to another
2. Interaction between two π bonds or a π bond and lone pair of electrons
3. In a multiple bonded compound as it is approached by a reagent
4. All of the above

Question Number : 21 Question Id : 150561121 Question Type : MCQ Option Shuffling : No

The limit test for arsenic in IP is based on _____.

Options :

1. Formation of stain on mercuric chloride paper
2. Titration with iodine
3. Reaction with EDTA

4. Absorption in UV region

Question Number : 22 Question Id : 150561122 Question Type : MCQ Option Shuffling : No

Paper chromatography separates compounds based on _____.

Options :

1. Partition between stationary phase (Water) and mobile phase (Liquid)
2. Charge differences
3. Volatility
4. Molecular size

Question Number : 23 Question Id : 150561123 Question Type : MCQ Option Shuffling : No

In polarography, the Ilkovic equation describes the relationship between the limiting diffusion current (I_d) and several variables. Which of the following is not a factor influencing the diffusion current.

Options :

1. the concentration of the electroactive species
2. the diffusion coefficient of the electroactive species
3. the temperature of the solution

4. the diameter of the reference electrode

Question Number : 24 Question Id : 150561124 Question Type : MCQ Option Shuffling : No

In gas chromatographic column the internal column diameter of packed column should be at least _____ times the diameter of the support particles.

Options :

1. Four
2. Six
3. Eight
4. Ten

Question Number : 25 Question Id : 150561125 Question Type : MCQ Option Shuffling : No

The wavelength change to shorter wavelength or higher energy is _____

Options :

1. Bathochromic shift
2. Hypsochromic shift
3. Calibration error

4. Hyperchromic effect

Question Number : 26 Question Id : 150561126 Question Type : MCQ Option Shuffling : No

Match the following phenomenon with the cause behind it.

- | | |
|-----------------------------|--|
| a. Eddy diffusion | I. Random molecular motion with in mobile phase |
| b. Longitudinal diffusion | II. Resistance between adjacent stream lines of mobile phase |
| c. Stationary mass transfer | III. In homogeneity of flow velocity and path lengths around packing particles |
| d. Radial mass transfer | IV. Resistance to mass transfer at the solute to stationary phase interface |

Options :

1. a – III b – I c – IV d – II
2. a – IV b – II c – I d – III
3. a – I b – III c – II d – IV
4. a – II b – IV c – III d – I

Question Number : 27 Question Id : 150561127 Question Type : MCQ Option Shuffling : No

Which ICH guideline gives details about quality risk management ?

Options :

1. Q3
2. Q6
3. Q9
4. Q12

Question Number : 28 Question Id : 150561128 Question Type : MCQ Option Shuffling : No

In IR spectroscopy finger print region is _____ cm^{-1} .

Options :

1. 4000 – 1500
2. 1500 – 600
3. 400 – 0
4. 5000 – 4000

Question Number : 29 Question Id : 150561129 Question Type : MCQ Option Shuffling : No

Na_2O 27%, Al_2O_3 5%, SiO_2 68% is composition of glasses for cation-sensitive glass electrode for determination of _____.

Options :

1. H^+ (Subject to alkaline error)
2. Li^+
3. Na^+ , Ag^+
4. K^+ , NH_4^+

Question Number : 30 Question Id : 150561130 Question Type : MCQ Option Shuffling : No

In gas-liquid chromatography a practical limit when the amount of energy needed to vaporize the sample is the same as the amount of energy required to break a carbon-carbon bond is known as _____.

Options :

1. Flash vaporization
2. Surface ionization
3. Thermal ionization
4. Pyrolysis

Question Number : 31 Question Id : 150561131 Question Type : MCQ Option Shuffling : No

The therapeutic index of a drug is defined as _____

Options :

1. Ratio of LD_{50} to ED_{50}
2. Ratio of absorption to elimination
3. Ratio of ED_{50} to LD_{50}
4. Difference between T_{max} and C_{max}

Question Number : 32 Question Id : 150561132 Question Type : MCQ Option Shuffling : No

Match the following Nobel prize winners with discoveries related to pharmacy.

- | | |
|--|--|
| a. Sir Frederick Grant Banting
and John James Rickard Macleod | I. Chemical transmission in nerves |
| b. Sir Henry Hallett Dale and
Otto Loewi | II. Role of G protein in signal transduction in cell |
| c. Sir Alexander Fleming,
Sir Ernst Borris Chain and
Lord Howard Walter florey | III. Insulin discovery |
| d. Alfred G. Gilman and
Martin Rodbell | IV. Curative effect of penicillin |
| | V. Discovery of beta blockers |

Options :

1. a – III b – II c – IV d – V
2. a – IV b – I c – III d – V
3. a – III b – I c – IV d – II
4. a – III b – I c – IV d – V

Question Number : 33 Question Id : 150561133 Question Type : MCQ Option Shuffling : No

In a dose-response curve experiment, an agonist shows a rightward parallel shift in the presence of a fixed concentration of antagonist, but the maximum effect ($E_{\max}$) remains the same. What does this indicate ?

Options :

1. Non competitive antagonism
2. Competitive antagonism
3. Irreversible antagonism
4. Allosteric inhibition

Question Number : 34 Question Id : 150561134 Question Type : MCQ Option Shuffling : No

Which of the following drug is not a prodrug ?

Options :

1. Enalapril
2. Cyclophosphamide
3. Cycloguanide
4. Propranolol

Question Number : 35 Question Id : 150561135 Question Type : MCQ Option Shuffling : No

Which neurotransmitter is excitatory in most CNS pathways ?

Options :

1. GABA
2. Glycine
3. Dopamine
4. Glutamate

Question Number : 36 Question Id : 150561136 Question Type : MCQ Option Shuffling : No

Which type of antigen-antibody mediated allergic reaction are the delayed reactions caused by the reaction between antigen and the cell specific antibody, probably because of degradation of the drug to reactive substance ?

Options :

1. Type I reaction
2. Type II reaction
3. Type III reaction
4. Type IV reaction

Question Number : 37 Question Id : 150561137 Question Type : MCQ Option Shuffling : No

Cell senescence is most closely associated with _____.

Options :

1. Mutation in centromere regions
2. Loss of ribosomal function
3. Telomerase dysfunction
4. Spindle fibre shortening

Question Number : 38 Question Id : 150561138 Question Type : MCQ Option Shuffling : No

All of the following drugs require therapeutic drug monitoring except _____.

Options :

1. Digoxin
2. Lithium
3. Theophylline
4. Thiazides

Question Number : 39 Question Id : 150561139 Question Type : MCQ Option Shuffling : No

Which of the following is a cholinesterase reactivator ?

Options :

1. Atropine
2. Physostigmine
3. Pilocarpine
4. Pralidoxime

Question Number : 40 Question Id : 150561140 Question Type : MCQ Option Shuffling : No

Following are therapeutic applications of sympathomimetics except _____.

Options :

1. Adrenaline is applied locally to arrest the local blood flow to achieve hemostasis in facial, oral and nasopharyngeal surgery
2. Xylometazoline, oxymetazoline produce nasal mucosal decongestion by alpha-2 agonist action in condition like common cold and hay fever
3. Ritodrine and isoetharine are used to suppress premature labour with goal to ensure adequate maturation of the fetus
4. Phenylephrine is used to produce miosis for the examination of fundus in condition like hypertension and diabetic retinopathy

Question Number : 41 Question Id : 150561141 Question Type : MCQ Option Shuffling : No

Which of the following type of angina is characterized by attack of pain following physical exertion or emotional excitement and is relieved by rest ?

Options :

1. Typical angina
2. Prinzmetal's variant angina
3. Crescendo angina

4. Unstable angina

Question Number : 42 Question Id : 150561142 Question Type : MCQ Option Shuffling : No

Super speciality Hospitals are _____

Options :

1. Primary Care Hospitals
2. Secondary Care Hospitals
3. Tertiary Level
4. None of these

Question Number : 43 Question Id : 150561143 Question Type : MCQ Option Shuffling : No

Which of these biomarkers is not suitable for diagnosis of myocardial infarction ?

Options :

1. Lactic dehydrogenase
2. Creatine Phosphokinase MM (CK – MM)
3. Creatine Phosphokinase MB (CK – MB)
4. Troponin

Question Number : 44 Question Id : 150561144 Question Type : MCQ Option Shuffling : No

Bromosulphalein Test is performed for estimation of _____

Options :

1. Liver Injury
2. Liver synthesis ability
3. Liver excretory function
4. Billiary obstruction

Question Number : 45 Question Id : 150561145 Question Type : MCQ Option Shuffling : No

Red hepatisation in Lobar pneumonia is characterised by which of the following histological findings ?

Options :

1. Numerous macrophages with hemosiderin laden pigments
2. Cellular exudate of neutrophils and extravasion of red cells
3. Alveolar septa becoming more perminent due to fibrosis
4. Minimal cellular infiltrate with viral cytopathic effect

Question Number : 46 Question Id : 150561146 Question Type : MCQ Option Shuffling : No

Hepatitis usually bening, self-limiting with incubation period of 15 to 45 days, occurs in epidemic form, mild severity and no incidences of chronic hepatitis or hepatocellular carcinoma and excellent prognosis _____.

Options :

1. Hepatitis A
2. Hepatitis B
3. Hepatitis C
4. Hepatitis D

Question Number : 47 Question Id : 150561147 Question Type : MCQ Option Shuffling : No

Which of the following drug interaction is an example of complexation /chelation leading to reduced absorption ?

Options :

1. Metronidazole with warfarin
2. Antacid with Tetracyclines
3. Hydralazine with Digoxin
4. Antacid with augmentin

Question Number : 48 Question Id : 150561148 Question Type : MCQ Option Shuffling : No

ECG changes is the tool used in diagnosis of acute myocardial infarction. Which one of the ECG change is not observed in it ?

Options :

1. ST-segment elevation
2. T-wave inversion
3. Deep Q-wave
4. Prolong QT interval

Question Number : 49 Question Id : 150561149 Question Type : MCQ Option Shuffling : No

All of the followings are facts regarding etiology of cell injury – except _____

Options :

1. Ischaemia and hypoxia are the most common forms of cell injury
2. Mild to moderate stress for shorter duration causes irreversible cell injury
3. The cellular response to stress depends upon the type of cell and tissue involved
4. Initially cell adapt to the changes due to injurious agent and may revert back to normal

Question Number : 50 Question Id : 150561150 Question Type : MCQ Option Shuffling : No

Which of the following best describe the ultimate goal of primordial prevention ?

Options :

1. To prevent complications of established diseases
2. To reduce the incidence of diseases by preventing exposure to risk factors
3. To eliminate the development of risk factors before they arise/not yet developed

4. Early diagnosis of diseases and provide prompt treatment

Question Number : 51 Question Id : 150561151 Question Type : MCQ Option Shuffling : No

As per Rule 164 of the Drugs and Cosmetic Rules, 1945, the method of testing ASU drugs should be _____.

Options :

1. Only as per Ayurvedic pharmacopoeia
2. As per the respective pharmacopoeia or if not available, by scientifically established method
3. Any method decided by the manufacturer
4. Only by classical siddha or unani texts

Question Number : 52 Question Id : 150561152 Question Type : MCQ Option Shuffling : No

Which of the following is not a chemical test for the identification of tannins ?

Options :

1. Gelatin test
2. Gold beaters skin test

3. Legal test
4. Phenazone test

Question Number : 53 Question Id : 150561153 Question Type : MCQ Option Shuffling : No

Which country awarded patent on turmeric to university of Mississippi medical centre for wound healing property ?

Options :

1. India
2. United States
3. China
4. South Africa

Question Number : 54 Question Id : 150561154 Question Type : MCQ Option Shuffling : No

The crude drugs are divided into different group according to the chemical nature of their most important constituents. Which drug from following contains alkaloids ?

Options :

1. Digitalis
2. Ashoka

3. Datura

4. Liquorice

Question Number : 55 Question Id : 150561155 Question Type : MCQ Option Shuffling : No

Which of the following is an example of ester resin ?

Options :

1. Colophony

2. Benzoin

3. Sandarac

4. All of the above

Question Number : 56 Question Id : 150561156 Question Type : MCQ Option Shuffling : No

Antioxidant nutraceuticals are those which contain following vitamin except _____.

Options :

1. A

2. B₁₂

3. C

4. E

Question Number : 57 Question Id : 150561157 Question Type : MCQ Option Shuffling : No

Clonal propagation is a potentially valuable method for producing high yielding crops at species which tend to be variable when growth from _____.

Options :

1. Root
2. Stem
3. Rhizome
4. Seed

Question Number : 58 Question Id : 150561158 Question Type : MCQ Option Shuffling : No

Which statement correctly matches panchkarma therapies with route and dosha ?

Options :

1. Nasya – Pergation, Kapha; Raktamokshana – Oral, Rakta
2. Virechana – Nasal, Pitta; Shirvirechana – Enema, Kapha
3. Shirvirechana – Nasal, Kapha; Virechana – Oral, Pitta

4. Shirvirechana – Oral, Pitta; Basti – Nasal, Vata

Question Number : 59 Question Id : 150561159 Question Type : MCQ Option Shuffling : No

Which of the following is source of insoluble dietary fibers ?

Options :

1. Legumes
2. Carrots
3. Nuts
4. Apples

Question Number : 60 Question Id : 150561160 Question Type : MCQ Option Shuffling : No

Match the following traditional system of medicines with contributors.

- | | |
|-----------------|-----------------------|
| a. Chinese | I. Aristotle Golen |
| b. Unani | II. Samuel Hahnemann |
| c. Homeopathic | III. Gantle Fosse |
| d. Aromatherapy | IV. Huang Di Nei Jing |

Options :

1. a – IV b – III c – II d – I
2. a – IV b – I c – II d – III

3. a – II b – IV c – I d – III

4. a – IV b – II c – III d – I

Question Number : 61 Question Id : 150561161 Question Type : MCQ Option Shuffling : No

Which of the following software is used to simplify lab workflow with unified control for effective data management ?

Options :

1. Chromeleon 7.2 CDS

2. LIMS

3. SPSS

4. Dynamed

Question Number : 62 Question Id : 150561162 Question Type : MCQ Option Shuffling : No

In corrosion engineering, localized damage caused by high-velocity liquid flow striking a metal surface, leading to removal of protective films and surface deterioration, is termed _____.

Options :

1. Pitting corrosions

2. Impingement attack
3. Service corrosion
4. Stress corrosion cracking

Question Number : 63 Question Id : 150561163 Question Type : MCQ Option Shuffling : No

Inspissation, used for sterilizing egg-based media like Lowenstein-Jensen, involves heating at _____.

Options :

1. 100°C for 30 minutes on 3-consecutive days
2. 121°C for 15 minutes under pressure
3. 80 – 85°C for 30 minutes on 3-consecutive days
4. 160°C for 1 hour in a hot-air oven

Question Number : 64 Question Id : 150561164 Question Type : MCQ Option Shuffling : No

Match the soil horizons with their characteristics :

- | | |
|----------------|---|
| a. O – Horizon | I. Surface little layer, freshly fallen leaves, twigs, fungi, animal waste, humans |
| b. A – Horizon | II. Partially decomposed organic matter, darker and looser, roots of most plants |
| c. B – Horizon | III. Subsoil, less organic matter, bacteria and fungi recycle soil nutrients, determines pH |
| d. C – Horizon | IV. Weathered parent material, no organic matter, controls chemical composition of soil |

Options :

1. a – I b – II c – III d – IV
2. a – II b – III c – I d – IV
3. a – IV b – I c – II d – III
4. a – I b – IV c – II d – III

Question Number : 65 Question Id : 150561165 Question Type : MCQ Option Shuffling : No

Various enzymes are derived by genetic engineering. These enzymes are used for a variety of therapeutic purpose. Match the following genetically engineered enzymes with their therapeutic applications.

- | | |
|-----------------|------------------------------|
| a. Urokinase | I. Cystic fibrosis |
| b. Asparaginase | II. Thrombolytic agent |
| c. Nuclease | III. Anti-inflammatory agent |
| d. Collagenase | IV. Anti-cancer agent |

Options :

1. a – I, b – III, c – IV, d – II
2. a – IV, b – II, c – III, d – I
3. a – III, b – I, c – II, d – IV
4. a – II, b – IV, c – I, d – III

Question Number : 66 Question Id : 150561166 Question Type : MCQ Option Shuffling : No

The value of pressure above the reference value of atmospheric pressure is termed as _____.

Options :

1. Gauge pressure

2. Vacuum
3. Absolute pressure
4. None of the above

Question Number : 67 Question Id : 150561167 Question Type : MCQ Option Shuffling : No

The working of fluid-energy mill is based on the principle of _____.

Options :

1. Impact
2. Attrition
3. Cutting
4. Attrition and impact

Question Number : 68 Question Id : 150561168 Question Type : MCQ Option Shuffling : No

Which one of these is not the basic mechanism for flow of heat during heat transfer ?

Options :

1. Conjunction
2. Conduction

3. Convection

4. Radiation

Question Number : 69 Question Id : 150561169 Question Type : MCQ Option Shuffling : No

According to CPCB water quality criteria, drinking water source without conventional treatment but after disinfection (Class – A) must satisfy which of the following ?

Options :

1. $DO \geq 4\text{mg/L}$, $BOD \leq 3\text{mg/L}$, Coliform ≤ 500 mPN/100ml
2. $DO \geq 6\text{mg/L}$, $BOD \leq 2\text{mg/L}$, Coliform ≤ 50 mPN/100ml
3. $DO \geq 5\text{mg/L}$, $BOD \leq 2\text{mg/L}$, Coliform ≤ 100 mPN/100ml
4. $DO \leq 4\text{mg/L}$, $BOD \leq 5\text{mg/L}$, Coliform ≤ 5000 mPN/100ml

Question Number : 70 Question Id : 150561170 Question Type : MCQ Option Shuffling : No

Acidified ferric ammonium sulphate or ceric sulphate solutions are the examples of chemical indicators that can be used for monitoring this type of sterilization process _____

Options :

1. Dry heat

2. Gaseous
3. Autoclaving
4. Radiation

Question Number : 71 Question Id : 150561171 Question Type : MCQ Option Shuffling : No

A process in which any substance or air is introduced into the female organ of a milch animal with the intension of drawing off any secretion of milk is called _____.

Options :

1. Milking
2. Doom Dev
3. Lactation
4. None of the above

Question Number : 72 Question Id : 150561172 Question Type : MCQ Option Shuffling : No
