Question Shuffling Allowed :	Yes

Question Number : 1 Question Id : 562303201 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following city has been declared the 'City of Music' by UNESCO recently ?

Options :

1. Gwalior
2. Jaipur
3. Hyderabad
4. Kozhikode

Question Number : 1 Question Id : 562303201 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

खालीलपैकी कोणत्या शहराला नुकतेच युनेस्कोने 'संगीताचे शहर' म्हणून घोषित केले आहे ?

Options :

1. ग्वालियर
2. जयपूर
3. हैदराबाद
4. कोझिकोडे

Question Number : 2 Question Id : 562303202 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which country recently banned the export of technology related to Rare Earth Metals ?

Options :

1. China

2. America
3. Russia
4. India

Question Number : 2 Question Id : 562303202 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

कोणत्या देशाने अलिकडेच रेअर अर्थ मेटलशी संबंधित तंत्रज्ञानाच्या निर्यातीवर बंदी घातली आहे ?

Options :

1. चीन
2. अमेरिका
3. रशिया
4. भारत

Question Number : 3 Question Id : 562303203 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which country received most gold medals in 19th Asian Games held in 2023 ?

Options :

1. Kazakhstan
2. Mongolia
3. People's Republic of China
4. Kuwait

Question Number : 3 Question Id : 562303203 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

2023 मध्ये झालेल्या 19 व्या आशियाई क्रीडा स्पर्धामध्ये सर्वाधिक सुवर्णपदके कोणत्या देशाने मिळवली ?

Options :

1. कझाकस्तान
2. मंगोलिया
3. चीनी जनवादी गणराज्य
4. कुवेत

Question Number : 4 Question Id : 562303204 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

Who is known as the 'Queen of Millet' ?

Options :

1. Kundra Bati Mandia
2. Jasra
3. Raimati Ghiuria
4. Juana

Question Number : 4 Question Id : 562303204 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

'क्वीन ऑफ मिलेट' म्हणून कोणाला ओळखले जाते ?

Options :

1. कुंद्रा बटी मांडीया

2. जसरा
3. रायमती घिऊरीया
4. जुआना

Question Number : 5 Question Id : 562303205 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The mission life of Chandrayaan-3 was one lunar day. One lunar day means how many days on earth ?

Options :

1. 28
2. 14
3. 07
4. 21

Question Number : 5 Question Id : 562303205 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

चांद्रयान-3 चे मिशन लाईफ एक चांद्रदिवस इतके होते. एक चांद्र दिवस म्हणजे पृथ्वीवरील किती दिवस ?

Options :

1. 28
2. 14
3. 07
4. 21

Question Number : 6 Question Id : 562303206 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following countries is not a member of G-20 ?

Options :

1. Russia
2. Bangladesh
3. South Africa
4. Republic of Korea

Question Number : 6 Question Id : 562303206 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

खालीलपैकी कोणता देश जी-20 चा सदस्य नाही ?

Options :

1. रशिया
2. बांग्लादेश
3. दक्षिण आफ्रिका
4. कोरिया गणराज्य

Question Number : 7 Question Id : 562303207 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which person associated with the film industry has been honoured with the 'Maharashtra Bhushan' award for the year 2023 ?

Options :

1. Ashok Saraf
2. Rohini Hattangadi
3. Asha Bhosale
4. Dr. Shriram Lagu

Question Number : 7 Question Id : 562303207 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

चित्रपट सृष्टीशी संबंधित कोणाला सन 2023 या वर्षाच्या 'महाराष्ट्र भूषण' पुरस्काराने सन्मानित करण्यात आले आहे ?

Options :

1. अशोक सराफ
2. रोहिणी हट्टंगडी
3. आशा भोसले
4. डॉ. श्रीराम लागू

Question Number : 8 Question Id : 562303208 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

'Katkari' tribe people in Maharashtra are being helped to build a house under which scheme of Government of Maharashtra ?

Options :

1. Pradhanmantri Aawas Yojana
2. Adim Aawas Yojana

Pardhi Aawas Yojana

3.

Ramai Aawas Yojana

4.

Question Number : 8 Question Id : 562303208 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

‘कातकरी’ जमाती मधील व्यक्तीला घर बांधून देण्यासाठी महाराष्ट्र शासनाच्या कोणत्या योजनेचा लाभ दिला जात आहे ?

Options :

1. प्रधानमंत्री आवास योजना
2. आदिम आवास योजना
3. पारधी आवास योजना
4. रमाई आवास योजना

Question Number : 9 Question Id : 562303209 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which former Chief Minister of Bihar has been honoured with the highest civilian award ‘Bharat Ratna’ in 2024 ?

Options :

1. Karpuri Thakur
2. B. P. Mandal
3. Jagannath Mishra
4. Srikrishna Sinha

Question Number : 9 Question Id : 562303209 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

बिहारच्या कोणत्या माजी मुख्यमंत्र्यांना 2024 मध्ये 'भारतरत्न' या सर्वोच्च नागरी पुरस्काराने सन्मानित करण्यात आले ?

Options :

1. कर्पूरी ठाकूर
2. बी. पी. मंडल
3. जगन्नाथ मिश्रा
4. श्रीकृष्ण सिन्हा

Question Number : 10 Question Id : 562303210 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

Which of the following country has become the 31st member of the North Atlantic Treaty Organization (NATO) ?

Options :

1. North Macedonia
2. Finland
3. Montenegro
4. Albania

Question Number : 10 Question Id : 562303210 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

खालीलपैकी कोणता देश नॉर्थ अटलांटिक ट्रीटी ऑर्गनायझेशन (नाटो) चा 31 वा सदस्य बनला आहे ?

Options :

1. नॉर्थ मॅसेडोनिया

2. फिनलैंड
3. मॉन्टेनेग्रो
4. अल्बानिया

Question Number : 11 Question Id : 562303211 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

“Information” means any material in any form, including :

- a. records, documents, memos, e-mails.

Question Shuffling Allowed :

Yes

Question Number : 13 Question Id : 562303213 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The term Deccan Traps is coined by W. H. Sykes after the _____ 'Trappa' meaning step like feature.

Options :

1. French word
2. Swedish word
3. Arabic word

4. Roman word

Question Number : 13 Question Id : 562303213 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The term Deccan Traps is coined by W. H. Sykes after the _____ 'Trappa' meaning step like feature.

Options :

1. French word
2. Swedish word
3. Arabic word
4. Roman word

Question Number : 14 Question Id : 562303214 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In the southern part of Kolhapur district, outcrops of mica schists are found surrounded by granitic gneiss. They are overlain by the sediments of

Options :

1. Middle Permian Barren Measures
2. Lower Gondwana Panchet Group
3. Middle Proterozoic Kaladagi Super Group
4. Banda Group

Question Number : 14 Question Id : 562303214 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In the southern part of Kolhapur district, outcrops of mica schists are found surrounded by granitic gneiss. They are overlain by the sediments of

Options :

1. Middle Permian Barren Measures
2. Lower Gondwana Panchet Group
3. Middle Proterozoic Kaladagi Super Group
4. Banda Group

Question Number : 15 Question Id : 562303215 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

These are represented by andesitic and tholeiitic basalts which occur north of Bahela and west of Chinchgarh

Options :

1. Pitepani Volcanics
2. Mangikhuta Volcanics
3. Sitagota Volcanics
4. Kotima Volcanics

Question Number : 15 Question Id : 562303215 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

These are represented by andesitic and tholeiitic basalts which occur north of Bahela and west of Chinchgarh

Options :

1. Pitepani Volcanics
2. Mangikhuta Volcanics
3. Sitagota Volcanics
4. Kotima Volcanics

Question Number : 16 Question Id : 562303216 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Ambenali formation extends up to Gulburga with two inliers of Poladpur formation exposed to the south of Solapur near

Options :

1. Chincholi
2. Takli
3. Achalpur
4. Dhamni

Question Number : 16 Question Id : 562303216 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Ambenali formation extends up to Gulburga with two inliers of Poladpur formation exposed to the south of Solapur near

Options :

1. Chincholi
2. Takli
3. Achalpur
4. Dhamni

Question Number : 17 Question Id : 562303217 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In the south towards Belgaum, Mahabaleshwar formation shows extensive development with isolated patches of the younger _____ exposed to the south west of Kolhapur.

Options :

1. Wai Formation
2. Desur Formation
3. Poladpur Formation
4. Panhala Formation

Question Number : 17 Question Id : 562303217 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In the south towards Belgaum, Mahabaleshwar formation shows extensive development with isolated patches of the younger _____ exposed to the south west of Kolhapur.

Options :

1. Wai Formation
2. Desur Formation

3. Poladpur Formation

4. Panhala Formation

Question Number : 18 Question Id : 562303218 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Kyanite and sillimanite deposits in Maharashtra are present in Bhandara and Gadchiroli districts belonging to the

Options :

1. Sakoli Group

2. Amgaon Group

3. Dharwar Super Group

4. Khairagarh Group

Question Number : 18 Question Id : 562303218 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Kyanite and sillimanite deposits in Maharashtra are present in Bhandara and Gadchiroli districts belonging to the

Options :

1. Sakoli Group

2. Amgaon Group

3. Dharwar Super Group

4.

Question Number : 19 Question Id : 562303219 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The Archaean rocks of the Konkan region are the northwest extension of the _____
representing the Dharwar succession.

Options :

1. Shimoga-Goa Schist belt
2. Satpura Mobile belt
3. Eastern Ghats Charnokite belt
4. Sausar-Chilpi Supracrustal belt

Question Number : 19 Question Id : 562303219 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The Archaean rocks of the Konkan region are the northwest extension of the _____
representing the Dharwar succession.

Options :

1. Shimoga-Goa Schist belt
2. Satpura Mobile belt
3. Eastern Ghats Charnokite belt
4. Sausar-Chilpi Supracrustal belt

Question Number : 20 Question Id : 562303220 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

Chikiala limestone of Jurassic Upper Gondwana are dominantly observed at the localities from

Options :

1. Nagpur district
2. Amravati district
3. Chandrapur district
4. Gadchiroli district

Question Number : 20 Question Id : 562303220 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

Chikiala limestone of Jurassic Upper Gondwana are dominantly observed at the localities from

Options :

1. Nagpur district
2. Amravati district
3. Chandrapur district
4. Gadchiroli district

Question Number : 21 Question Id : 562303221 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

Which one of the following Formations does not belong to Kalsubai subgroup ?

Options :

1. Bhimashankar
2. Igatpuri
3. Mahabaleshwar
4. Neral

Question Number : 21 Question Id : 562303221 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which one of the following Formations does not belong to Kalsubai subgroup ?

Options :

1. Bhimashankar
2. Igatpuri
3. Mahabaleshwar
4. Neral

Question Number : 22 Question Id : 562303222 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The Spheroidal weathering is more common in _____ Basalt.

Options :

1. Columnar
2. Vesicular
3. Amygdaloidal

4. Compact

Question Number : 22 Question Id : 562303222 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

The Spheroidal weathering is more common in _____ Basalt.

Options :

1. Columnar
2. Vesicular
3. Amygdaloidal
4. Compact

Question Number : 23 Question Id : 562303223 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

_____ mountain is the oldest in Deccan Basalts.

Options :

1. Salher
2. Saptashrungi
3. Kalsubai
4. Alang-Kulang

Question Number : 23 Question Id : 562303223 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

_____ mountain is the oldest in Deccan Basalts.

Options :

1. Salher
2. Saptashrungi
3. Kalsubai
4. Alang-Kulang

Question Number : 24 Question Id : 562303224 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The rich manganese deposits occur in _____ formation of Sausar group.

Options :

1. Mansar
2. Bichua
3. Sitasaongi
4. Kadbikhere

Question Number : 24 Question Id : 562303224 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The rich manganese deposits occur in _____ formation of Sausar group.

Options :

1. Mansar
2. Bichua
3. Sitasaongi
- 4.

Question Number : 25 Question Id : 562303225 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The last episode in the geological history of Maharashtra state was the formation of Laterite and _____.

Options :

1. Colluvium
2. Alluvium
3. Lametas
4. Dykes

Question Number : 25 Question Id : 562303225 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The last episode in the geological history of Maharashtra state was the formation of Laterite and _____.

Options :

1. Colluvium
2. Alluvium
3. Lametas
4. Dykes

Question Number : 26 Question Id : 562303226 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Laterite and Bauxite are the dominant mixtures of which of the following ?

Options :

1. $\text{Fe}(\text{OH})_3$ and $\text{Al}(\text{OH})_3$
2. $\text{Na}(\text{OH})_3$ and $\text{K}(\text{OH})_3$
3. $\text{Al}(\text{OH})_3$ and $\text{Mn}(\text{OH})_3$
4. $\text{Fe}(\text{OH})_3$ and $\text{Mn}(\text{OH})_3$

Question Number : 26 Question Id : 562303226 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

Laterite and Bauxite are the dominant mixtures of which of the following ?

Options :

1. $\text{Fe}(\text{OH})_3$ and $\text{Al}(\text{OH})_3$
2. $\text{Na}(\text{OH})_3$ and $\text{K}(\text{OH})_3$
3. $\text{Al}(\text{OH})_3$ and $\text{Mn}(\text{OH})_3$
4. $\text{Fe}(\text{OH})_3$ and $\text{Mn}(\text{OH})_3$

Question Number : 27 Question Id : 562303227 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

An outcrop can be defined as

Options :

1. Exposure of thick soil on the surface

2. Exposure of solid rock on the surface
3. Exposure of sand on the surface
4. Exposure of regolith on the surface

Question Number : 27 Question Id : 562303227 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

An outcrop can be defined as

Options :

1. Exposure of thick soil on the surface
2. Exposure of solid rock on the surface
3. Exposure of sand on the surface
4. Exposure of regolith on the surface

Question Number : 28 Question Id : 562303228 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following is a layered structure developed in extremely fine grained sedimentary rocks, where the different layers are very thin ?

Options :

1. Lamination
2. Stratification
3. Graded bedding
- 4.

Current bedding

Question Number : 28 Question Id : 562303228 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following is a layered structure developed in extremely fine grained sedimentary rocks, where the different layers are very thin ?

Options :

1. Lamination
2. Stratification
3. Graded bedding
4. Current bedding

Question Number : 29 Question Id : 562303229 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ is a geographic direction, given by the line of intersection of a horizontal plane with a bedding plane of layer of rock.

Options :

1. Strike of bed
2. Dip of bed
3. Plunge of bed
4. Hade of bed

Question Number : 29 Question Id : 562303229 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ is a geographic direction, given by the line of intersection of a horizontal plane with a bedding plane of layer of rock.

Options :

1. Strike of bed
2. Dip of bed
3. Plunge of bed
4. Hade of bed

Question Number : 30 Question Id : 562303230 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

What is the term used for the imaginary line that passes through all the points of maximum curvature in a folded sequence ?

Options :

1. Axis of fold
2. Plunge of fold
3. Axial plane of fold
4. Limb of fold

Question Number : 30 Question Id : 562303230 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

What is the term used for the imaginary line that passes through all the points of maximum curvature in a folded sequence ?

Options :

1. Axis of fold
2. Plunge of fold
3. Axial plane of fold
4. Limb of fold

Question Number : 31 Question Id : 562303231 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The angle made by the fault plane with the vertical is called as

Options :

1. Strike of fault
2. Dip of fault
3. Hade of fault
4. Slip of fault

Question Number : 31 Question Id : 562303231 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The angle made by the fault plane with the vertical is called as

Options :

1. Strike of fault
2. Dip of fault

3. Hade of fault

4. Slip of fault

Question Number : 32 Question Id : 562303232 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Drag folds develop within

- a. The body of incompetent rocks surrounded by competent rocks.
- b. The body of competent rocks surrounded by incompetent rocks.
- c. The body of competent rock is surrounded by competent rock.
- d. The body of incompetent rock is surrounded by incompetent rock.

Options :

1. a only

2. b and c

3. c and d

4. None of the above

Question Number : 32 Question Id : 562303232 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Drag folds develop within

- a. The body of incompetent rocks surrounded by competent rocks.
- b. The body of competent rocks surrounded by incompetent rocks.
- c. The body of competent rock is surrounded by competent rock.
- d. The body of incompetent rock is surrounded by incompetent rock.

Options :

1. a only
2. b and c
3. c and d
4. None of the above

Question Number : 33 Question Id : 562303233 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

A crack in the rock along which there is no relative movement is called

Options :

1. Fold
2. Fault
3. Unconformity
4. Fracture

Question Number : 33 Question Id : 562303233 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

A crack in the rock along which there is no relative movement is called

Options :

1. Fold
2. Fault
3. Unconformity

4. Fracture

Question Number : 34 Question Id : 562303234 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

In the dip-slip fault the rake of net slip is

Options :

1. 0°
2. 45°
3. 30°
4. 90°

Question Number : 34 Question Id : 562303234 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

In the dip-slip fault the rake of net slip is

Options :

1. 0°
2. 45°
3. 30°
4. 90°

Question Number : 35 Question Id : 562303235 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

The angle of maximum inclination of rock bed with horizontal is called as

Options :

1. Strike of bed
2. Dip of bed
3. Apparent dip
4. Heave of bed

Question Number : 35 Question Id : 562303235 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The angle of maximum inclination of rock bed with horizontal is called as

Options :

1. Strike of bed
2. Dip of bed
3. Apparent dip
4. Heave of bed

Question Number : 36 Question Id : 562303236 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

One of the following features is not associated with strike-slip fault

Options :

1. Unconformity
2. Linear structure
3. Triangular facet

4. Outlier

Question Number : 36 Question Id : 562303236 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

One of the following features is not associated with strike-slip fault

Options :

1. Unconformity
2. Linear structure
3. Triangular facet
4. Outlier

Question Number : 37 Question Id : 562303237 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following geological structures have younger formation in core and older formation at fringe of structure ?

Options :

1. Anticline
2. Syncline
3. Antiform
4. Synform

Question Number : 37 Question Id : 562303237 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

Which of the following geological structures have younger formation in core and older formation at fringe of structure ?

Options :

1. Anticline
2. Syncline
3. Antiform
4. Synform

Question Number : 38 Question Id : 562303238 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Match the pairs :

Types of Fold	Amount of Dip (in degrees)
A. Upright fold	1. 30 – 10
B. Moderately inclined	2. 90 – 80
C. Gently inclined	3. 80 – 60
D. Steeply inclined	4. 60 – 30

Options :

1. A – 2 B – 4 C – 1 D – 3
2. A – 2 B – 1 C – 4 D – 3
3. A – 1 B – 4 C – 3 D – 2
4. A – 2 B – 4 C – 3 D – 1

Question Number : 38 Question Id : 562303238 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Match the pairs :

Types of Fold	Amount of Dip (in degrees)
A. Upright fold	1. 30 – 10
B. Moderately inclined	2. 90 – 80
C. Gently inclined	3. 80 – 60
D. Steeply inclined	4. 60 – 30

Options :

1. A – 2 B – 4 C – 1 D – 3
2. A – 2 B – 1 C – 4 D – 3
3. A – 1 B – 4 C – 3 D – 2
4. A – 2 B – 4 C – 3 D – 1

Question Number : 39 Question Id : 562303239 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The movement of rock blocks parallel to fault plane is caused by shearing forces is known as

Options :

1. Dip-slip fault
2. Strike-slip fault
- 3.

Oblique-slip fault

4. Flexural-slip fault

Question Number : 39 Question Id : 562303239 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The movement of rock blocks parallel to fault plane is caused by shearing forces is known as

Options :

1. Dip-slip fault

2. Strike-slip fault

3. Oblique-slip fault

4. Flexural-slip fault

Question Number : 40 Question Id : 562303240 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Extensional joint developed perpendicular to

Options :

1. Minimum principal stress

2. Intermediate principal stress

3. Maximum principal stress

4. Plane of maximum shear stress

Question Number : 40 Question Id : 562303240 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Extensional joint developed perpendicular to

Options :

1. Minimum principal stress
2. Intermediate principal stress
3. Maximum principal stress
4. Plane of maximum shear stress

Question Number : 41 Question Id : 562303241 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which rock is formed when the explosive fragments are embedded in lava matrix ?

Options :

1. Volcanic breccia
2. Volcanic bomb
3. Volcanic lapilli
4. Volcanic tuff

Question Number : 41 Question Id : 562303241 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which rock is formed when the explosive fragments are embedded in lava matrix ?

Options :

1. Volcanic breccia

2. Volcanic bomb
3. Volcanic lapilli
4. Volcanic tuff

Question Number : 42 Question Id : 562303242 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Bichua, Junewani, Lohangi, Sitasaongi are the formation names of

Options :

1. Sakoli Group
2. Sausar Group
3. Gondwana Supergroup
4. Khairagarh Group

Question Number : 42 Question Id : 562303242 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Bichua, Junewani, Lohangi, Sitasaongi are the formation names of

Options :

1. Sakoli Group
2. Sausar Group
3. Gondwana Supergroup
- 4.

Khairagarh Group

Question Number : 43 Question Id : 562303243 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which one of the following is not a lithostratigraphic part of the Pranhita-Godavari basin ?

Options :

1. Pakhal Supergroup
2. Penganga Group
3. Sullavai Group
4. Bagalkot Group

Question Number : 43 Question Id : 562303243 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which one of the following is not a lithostratigraphic part of the Pranhita-Godavari basin ?

Options :

1. Pakhal Supergroup
2. Penganga Group
3. Sullavai Group
4. Bagalkot Group

Question Number : 44 Question Id : 562303244 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

The Motur formation occur as part of which stratigraphy in Maharashtra ?

Options :

1. Sakoli
2. Sausar
3. Gondwana
4. Kaladgi

Question Number : 44 Question Id : 562303244 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

The Motur formation occur as part of which stratigraphy in Maharashtra ?

Options :

1. Sakoli
2. Sausar
3. Gondwana
4. Kaladgi

Question Number : 45 Question Id : 562303245 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

The thickest subgroup in the Western Deccan province is known as

Options :

1. Wai
- 2.

Lonavala

3. Kalsubai

4. Malwa

Question Number : 45 Question Id : 562303245 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The thickest subgroup in the Western Deccan province is known as

Options :

1. Wai

2. Lonavala

3. Kalsubai

4. Malwa

Question Number : 46 Question Id : 562303246 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The emplacement of flow is through the process called _____ which causes the thickening of the lobes by continued injection of lava.

Options :

1. Explosion

2. Effusion

3. Inflation

4. Deflation

Question Number : 46 Question Id : 562303246 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The emplacement of flow is through the process called _____ which causes the thickening of the lobes by continued injection of lava.

Options :

1. Explosion
2. Effusion
3. Inflation
4. Deflation

Question Number : 47 Question Id : 562303247 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The rocks formed by cooling of magma at greater depths are termed as

Options :

1. Plutonic rocks
2. Hypabyssal rocks
3. Volcanic rocks
4. Mesocratic rocks

Question Number : 47 Question Id : 562303247 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

The rocks formed by cooling of magma at greater depths are termed as

Options :

1. Plutonic rocks
2. Hypabyssal rocks
3. Volcanic rocks
4. Mesocratic rocks

Question Number : 48 Question Id : 562303248 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which one of the following is the converse of porphyritic texture ?

Options :

1. Panidiomorphic texture
2. Hypidiomorphic texture
3. Poikilitic texture
4. Felsitic texture

Question Number : 48 Question Id : 562303248 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which one of the following is the converse of porphyritic texture ?

Options :

1. Panidiomorphic texture

2. Hypidiomorphic texture

3. Poikilitic texture

4. Felsitic texture

Question Number : 49 Question Id : 562303249 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In which of the following tectonic setting magma of alkaline series does not occur ?

Options :

1. Constructive

2. Destructive

3. Intra-oceanic

4. Intra-continental

Question Number : 49 Question Id : 562303249 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In which of the following tectonic setting magma of alkaline series does not occur ?

Options :

1. Constructive

2. Destructive

3. Intra-oceanic

4.

Intra-continental

**Question Number : 50 Question Id : 562303250 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5**

Gneiss is formed by

Options :

1. Dyana~~m~~othermal metamorphism
2. Contact metamorphism
3. Cataclastic metamorphism
4. Plutonic metamorphism

**Question Number : 50 Question Id : 562303250 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5**

Gneiss is formed by

Options :

1. Dyana~~m~~othermal metamorphism
2. Contact metamorphism
3. Cataclastic metamorphism
4. Plutonic metamorphism

**Question Number : 51 Question Id : 562303251 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5**

Which one of the following is not the correct mode of production of bicarbonate ions during basaltic weathering ?

Options :

1. Olivine + Carbonic acid $\rightarrow$ Dissolved ions + Bicarbonate ions + Silicic acid
2. Pyroxene + Water + Carbonic acid $\rightarrow$ Dissolved ions + Bicarbonate ions + Silicic acid
3. Plagioclase + Sulfuric acid $\rightarrow$ Carbonic acid + Silicic acid
4. Plagioclase + Carbonic acid $\rightarrow$ Dissolved ions + Bicarbonate ions

Question Number : 51 Question Id : 562303251 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which one of the following is not the correct mode of production of bicarbonate ions during basaltic weathering ?

Options :

1. Olivine + Carbonic acid $\rightarrow$ Dissolved ions + Bicarbonate ions + Silicic acid
2. Pyroxene + Water + Carbonic acid $\rightarrow$ Dissolved ions + Bicarbonate ions + Silicic acid
3. Plagioclase + Sulfuric acid $\rightarrow$ Carbonic acid + Silicic acid
4. Plagioclase + Carbonic acid $\rightarrow$ Dissolved ions + Bicarbonate ions

Question Number : 52 Question Id : 562303252 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In binary system, due to crystallization of magmatic melt at eutectic point the texture formed is

Options :

1. Porphyritic texture
2. Ophitic texture
3. Intergranular texture
4. Graphic texture

Question Number : 52 Question Id : 562303252 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In binary system, due to crystallization of magmatic melt at eutectic point the texture formed is

Options :

1. Porphyritic texture
2. Ophitic texture
3. Intergranular texture
4. Graphic texture

Question Number : 53 Question Id : 562303253 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Concentrically layered carbonate particles over 2 mm across are called as

Options :

1. Pisoids

2. Ooid
3. Oncoid
4. Peloid

Question Number : 53 Question Id : 562303253 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Concentrically layered carbonate particles over 2 mm across are called as

Options :

1. Pisoids
2. Ooid
3. Oncoid
4. Peloid

Question Number : 54 Question Id : 562303254 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following rock is more resistant to chemical weathering ?

Options :

1. Shale
2. Limestone
3. Sandstone
- 4.

None of these

Question Number : 54 Question Id : 562303254 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following rock is more resistant to chemical weathering ?

Options :

1. Shale
2. Limestone
3. Sandstone
4. None of these

Question Number : 55 Question Id : 562303255 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In desert area, loose particles lying upon the ground surface may be lifted into the air or rolled along the ground. This process is called as

Options :

1. Abrasion
2. Plucking
3. Deflation
4. Corrosion

Question Number : 55 Question Id : 562303255 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In desert area, loose particles lying upon the ground surface may be lifted into the air or rolled along the ground. This process is called as

Options :

1. Abrasion
2. Plucking
3. Deflation
4. Corrosion

Question Number : 56 Question Id : 562303256 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Debris may be carried by two glacier streams, where they join, this marginal debris is dragged along to form a _____, riding upon the ice in midstream.

Options :

1. Terminal moraine
2. Medial moraine
3. Lateral moraine
4. Recessional moraine

Question Number : 56 Question Id : 562303256 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Debris may be carried by two glacier streams, where they join, this marginal debris is dragged along to form a _____, riding upon the ice in midstream.

Options :

1. Terminal moraine
2. Medial moraine
3. Lateral moraine
4. Recessional moraine

Question Number : 57 Question Id : 562303257 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The principle of 'Uniformitarianism' was first given by

Options :

1. W. M. Davis
2. Penck
3. C. E. Dutton
4. Hutton

Question Number : 57 Question Id : 562303257 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The principle of 'Uniformitarianism' was first given by

Options :

1. W. M. Davis
2. Penck
3. C. E. Dutton

4. Hutton

Question Number : 58 Question Id : 562303258 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

Match the following :

- | | |
|-------------|--------------------|
| a. Pravara | I. Ajantha Hills |
| b. Purna | II. Buldhana Range |
| c. Manjara | III. Western Ghats |
| d. Penganga | IV. Balaghat |

Options :

1. a – III b – I c – II d – IV

2. a – III b – I c – IV d – II

3. a – II b – III c – I d – IV

4. a – III b – II c – I d – IV

Question Number : 58 Question Id : 562303258 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

Match the following :

- | | |
|-------------|--------------------|
| a. Pravara | I. Ajantha Hills |
| b. Purna | II. Buldhana Range |
| c. Manjara | III. Western Ghats |
| d. Penganga | IV. Balaghat |

Options :

1. a – III b – I c – II d – IV

2. a – III b – I c – IV d – II

3. a – II b – III c – I d – IV

4. a – III b – II c – I d – IV

Question Number : 59 Question Id : 562303259 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Due to combination of causes usually including chemical, thermal and physical processes, the outer portion of rock peel off in small and large slabs or sheets. This process is called

Options :

1. Frost action

2. Talus

3. Exfoliation

4. Spheroidal weathering

Question Number : 59 Question Id : 562303259 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Due to combination of causes usually including chemical, thermal and physical processes, the outer portion of rock peel off in small and large slabs or sheets. This process is called

Options :

1. Frost action

- 2. Talus
- 3. Exfoliation
- 4. Spheroidal weathering

Question Number : 60 Question Id : 562303260 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

Which of the following is not a denudational process ?

Options :

- 1. Weathering
- 2. Mass wasting
- 3. Erosion
- 4. Aggradation

Question Number : 60 Question Id : 562303260 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5

Which of the following is not a denudational process ?

Options :

- 1. Weathering
- 2. Mass wasting
- 3. Erosion
- 4.

Aggradation

Question Number : 61 Question Id : 562303261 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which streams flow in the opposite direction of the dip of rock strata ?

Options :

1. Obsequent
2. Subsequent
3. Resequent
4. Consequent

Question Number : 61 Question Id : 562303261 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which streams flow in the opposite direction of the dip of rock strata ?

Options :

1. Obsequent
2. Subsequent
3. Resequent
4. Consequent

Question Number : 62 Question Id : 562303262 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following is not a characteristic of young stage of Davis cycle of erosion ?

Options :

1. Waterfalls, Rapids exists in this stage
2. Characterised George or V shaped valley
3. Vertical erosion is very high
4. Lateral erosion leads to valley widening

**Question Number : 62 Question Id : 562303262 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5**

Which of the following is not a characteristic of young stage of Davis cycle of erosion ?

Options :

1. Waterfalls, Rapids exists in this stage
2. Characterised George or V shaped valley
3. Vertical erosion is very high
4. Lateral erosion leads to valley widening

**Question Number : 63 Question Id : 562303263 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5**

Consider the following statements :

- a. Dendritic drainage patterns are characterized by irregular branching of tributary streams in many direction and at almost any angle.
- b. Trellis drainage patterns are particularly well displayed in the folded Appalachians where alternating weak and strong strata have been truncated by stream erosion.
- c. In Barbed drainage patterns, both the main stream and its tributaries display right angled bends.

Which of the above statement/statements is/are correct ?

Options :

- 1. a only
- 2. a and b only
- 3. b and c only
- 4. a, b and c

Question Number : 63 Question Id : 562303263 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Consider the following statements :

- a. Dendritic drainage patterns are characterized by irregular branching of tributary streams in many direction and at almost any angle.
- b. Trellis drainage patterns are particularly well displayed in the folded Appalachians where alternating weak and strong strata have been truncated by stream erosion.
- c. In Barbed drainage patterns, both the main stream and its tributaries display right angled bends.

Which of the above statement/statements is/are correct ?

Options :

1. a only
2. a and b only
3. b and c only
4. a, b and c

Question Number : 64 Question Id : 562303264 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ map is special map exclusively prepared for hydrological survey.

Options :

1. Hydro-morphological map
2. Road map
3. Vegetation map
4. None of the above

Question Number : 64 Question Id : 562303264 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ map is special map exclusively prepared for hydrological survey.

Options :

1. Hydro-morphological map
2. Road map
3. Vegetation map

4. None of the above

Question Number : 65 Question Id : 562303265 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In Raster data structure everything is represented by

Options :

1. Point
2. Grid cells
3. Line
4. Polygon

Question Number : 65 Question Id : 562303265 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In Raster data structure everything is represented by

Options :

1. Point
2. Grid cells
3. Line
4. Polygon

Question Number : 66 Question Id : 562303266 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ classification is a means by which pixels in an image are assigned to spectral classes without the user having foreknowledge of the existence or names of those classes.

Options :

1. Normal classification
2. Supervised classification
3. Unsupervised classification
4. None of the above

Question Number : 66 Question Id : 562303266 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ classification is a means by which pixels in an image are assigned to spectral classes without the user having foreknowledge of the existence or names of those classes.

Options :

1. Normal classification
2. Supervised classification
3. Unsupervised classification
4. None of the above

Question Number : 67 Question Id : 562303267 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Radio Detection and Ranging (RADAR) is an _____ microwave remote sensing system.

Options :

1. Active
2. Passive
3. Both (1) and (2)
4. None of the above

Question Number : 67 Question Id : 562303267 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Radio Detection and Ranging (RADAR) is an _____ microwave remote sensing system.

Options :

1. Active
2. Passive
3. Both (1) and (2)
4. None of the above

Question Number : 68 Question Id : 562303268 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Image processing is a set of computational techniques for

- a. Analyzing images
- b. Enhancing images
- c. Compressing images
- d. Reconstructing images

Options :

- 1. Only a and c
- 2. Only b and d
- 3. a, c and d
- 4. a, b, c and d

**Question Number : 68 Question Id : 562303268 Question Type : MCQ Option Shuffling : No
Correct Marks : 2 Wrong Marks : 0.5**

Image processing is a set of computational techniques for

- a. Analyzing images
- b. Enhancing images
- c. Compressing images
- d. Reconstructing images

Options :

- 1. Only a and c
- 2. Only b and d
- 3. a, c and d
- 4. a, b, c and d

Question Number : 69 Question Id : 562303269 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following aerial photograph will have nadir point, principal point and isocenter all at the same point ?

Options :

1. Low oblique photograph
2. High oblique photograph
3. Vertical photograph
4. Convergent photograph

Question Number : 69 Question Id : 562303269 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following aerial photograph will have nadir point, principal point and isocenter all at the same point ?

Options :

1. Low oblique photograph
2. High oblique photograph
3. Vertical photograph
4. Convergent photograph

Question Number : 70 Question Id : 562303270 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Among the surface geophysical methods for ground water exploration includes

- a. Electromagnetic method
- b. Gravimetric method
- c. Seismic method
- d. All of the above

Options :

1. d

2. b

3. a

4. c

Question Number : 70 Question Id : 562303270 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Among the surface geophysical methods for ground water exploration includes

- a. Electromagnetic method
- b. Gravimetric method
- c. Seismic method
- d. All of the above

Options :

1. d

2. b

3. a

4. c

Question Number : 71 Question Id : 562303271 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In a saturated rock or soil the resistivity is largely dependent on the

Options :

1. Density of the material
2. Porosity of the material
3. Salinity of the saturated fluid
4. All of the above

Question Number : 71 Question Id : 562303271 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In a saturated rock or soil the resistivity is largely dependent on the

Options :

1. Density of the material
2. Porosity of the material
3. Salinity of the saturated fluid
4. All of the above

Question Number : 72 Question Id : 562303272 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In an electrical resistivity survey electric current is passed into the ground through the pair of

Options :

- 1.

Potential electrode

2. Current electrode

3. Time electrode

4. None of the above

Question Number : 72 Question Id : 562303272 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In an electrical resistivity survey electric current is passed into the ground through the pair of

Options :

1. Potential electrode

2. Current electrode

3. Time electrode

4. None of the above

Question Number : 73 Question Id : 562303273 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ is defined as the total water loss at the maximum rate through evaporation from open water surfaces and transpiration by vegetation from an extensive area fully covered by vegetation with unlimited water supply.

- a. Potential evapotranspiration
- b. Potential water volume
- c. Water balance
- d. Transpiration

Options :

- 1. c only
- 2. a and d only
- 3. b and c only
- 4. a only

Question Number : 73 Question Id : 562303273 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ is defined as the total water loss at the maximum rate through evaporation from open water surfaces and transpiration by vegetation from an extensive area fully covered by vegetation with unlimited water supply.

- a. Potential evapotranspiration
- b. Potential water volume
- c. Water balance
- d. Transpiration

Options :

- 1. c only

- 2. a and d only
- 3. b and c only
- 4. a only

Question Number : 74 Question Id : 562303274 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The _____ is the amount of water per unit volume of a saturated formation that is stored or expelled from storage owing to compressibility of the mineral skeleton and the pore water per unit change in head.

- a. Specific gravity
- b. Specific storage
- c. Storage
- d. Porosity

Options :

- 1. a, b and c
- 2. a and b only
- 3. c and d only
- 4. b only

Question Number : 74 Question Id : 562303274 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The _____ is the amount of water per unit volume of a saturated formation that is stored or expelled from storage owing to compressibility of the mineral skeleton and the pore water per unit change in head.

- a. Specific gravity
- b. Specific storage
- c. Storage
- d. Porosity

Options :

- 1. a, b and c
- 2. a and b only
- 3. c and d only
- 4. b only

Question Number : 75 Question Id : 562303275 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ bring basic geological information together with data on the hydraulic and hydrochemical characteristics of the rocks and their usefulness for groundwater supply.

- a. Hydrogeological maps
- b. Precipitations
- c. Lithological map
- d. Topographic and Contour map

Options :

- 1. a and b only

- 2. a only
- 3. b only
- 4. c and d only

Question Number : 75 Question Id : 562303275 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ bring basic geological information together with data on the hydraulic and hydrochemical characteristics of the rocks and their usefulness for groundwater supply.

- a. Hydrogeological maps
- b. Precipitations
- c. Lithological map
- d. Topographic and Contour map

Options :

- 1. a and b only
- 2. a only
- 3. b only
- 4. c and d only

Question Number : 76 Question Id : 562303276 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In a confined aquifer, the water level in a well usually rises above the top of the aquifer.

If it does, the well is called

- a. Setted well
- b. Horizontal bored well
- c. Dug well
- d. Artesian well

Options :

- 1. a and b only
- 2. c and d only
- 3. a only
- 4. d only

Question Number : 76 Question Id : 562303276 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In a confined aquifer, the water level in a well usually rises above the top of the aquifer.

If it does, the well is called

- a. Setted well
- b. Horizontal bored well
- c. Dug well
- d. Artesian well

Options :

- 1. a and b only
- 2. c and d only
- 3. a only

4. d only

Question Number : 77 Question Id : 562303277 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Hydrological maps are important for

- a. Identification of locations for site-specific recharge structures
- b. To know geological structures
- c. To know quality of water
- d. To study geological settings

Options :

- 1. a only
- 2. b and c
- 3. c and d
- 4. d only

Question Number : 77 Question Id : 562303277 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Hydrological maps are important for

- a. Identification of locations for site-specific recharge structures
- b. To know geological structures
- c. To know quality of water
- d. To study geological settings

Options :

- 1. a only

2. b and c
3. c and d
4. d only

Question Number : 78 Question Id : 562303278 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following factors are important related to various aspects of movement of groundwater in the aquifer ?

- a. Permeability
- b. Impermeability
- c. Hydraulic conductivity
- d. Transmissivity

Options :

1. a, b and c
2. a, b and d
3. a, c and d
4. b, c and d

Question Number : 78 Question Id : 562303278 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following factors are important related to various aspects of movement of groundwater in the aquifer ?

- a. Permeability
- b. Impermeability
- c. Hydraulic conductivity
- d. Transmissivity

Options :

- 1. a, b and c
- 2. a, b and d
- 3. a, c and d
- 4. b, c and d

Question Number : 79 Question Id : 562303279 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The yield from an aquifer depends upon which of the following natural factors ?

Options :

- 1. The capacity of an aquifer to hold water
- 2. Rate of annual recharge
- 3. Rate of annual withdrawal
- 4. All of the above

Question Number : 79 Question Id : 562303279 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The yield from an aquifer depends upon which of the following natural factors ?

Options :

1. The capacity of an aquifer to hold water
2. Rate of annual recharge
3. Rate of annual withdrawal
4. All of the above

Question Number : 80 Question Id : 562303280 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In the zone of aeration, open spaces in the rocks are

Options :

1. Completely filled with water
2. Completely filled with air
3. Partially filled with water and air
4. Filled neither with water nor air

Question Number : 80 Question Id : 562303280 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In the zone of aeration, open spaces in the rocks are

Options :

1. Completely filled with water
2. Completely filled with air

- 3. Partially filled with water and air
- 4. Filled neither with water nor air

Question Number : 81 Question Id : 562303281 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following method or test is used to evaluate the yield of the well ?

Options :

- 1. Resistivity test
- 2. Gravimetric test
- 3. Pumping test
- 4. Electromagnetic test

Question Number : 81 Question Id : 562303281 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which of the following method or test is used to evaluate the yield of the well ?

Options :

- 1. Resistivity test
- 2. Gravimetric test
- 3. Pumping test
- 4. Electromagnetic test

Question Number : 82 Question Id : 562303282 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

Fluctuations of groundwater levels are directly related to changes in the amount of water in storage of _____ aquifer.

Options :

1. Semi confined
2. Confined
3. Unconfined
4. Leaky

Question Number : 82 Question Id : 562303282 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

Fluctuations of groundwater levels are directly related to changes in the amount of water in storage of _____ aquifer.

Options :

1. Semi confined
2. Confined
3. Unconfined
4. Leaky

Question Number : 83 Question Id : 562303283 Question Type : MCQ Option Shuffling : No

Correct Marks : 2 Wrong Marks : 0.5

In groundwater contour maps, the converse contours indicate the regions of groundwater.

Options :

1. Discharge
2. Recharge
3. Radial flow
4. Scarcity

Question Number : 83 Question Id : 562303283 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In groundwater contour maps, the converse contours indicate the regions of groundwater.

Options :

1. Discharge
2. Recharge
3. Radial flow
4. Scarcity

Question Number : 84 Question Id : 562303284 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The basaltic rock terrain is favourable for groundwater circulation. The structural control on the circulation of groundwater is due to gentle gradients of lava flows in different directions. The circulation takes place in the depth ranges of _____ meters.

Options :

1. 10 – 20

2. 30 – 40
3. 50 – 60
4. 70 – 80

Question Number : 84 Question Id : 562303284 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The basaltic rock terrain is favourable for groundwater circulation. The structural control on the circulation of groundwater is due to gentle gradients of lava flows in different directions. The circulation takes place in the depth ranges of _____ meters.

Options :

1. 10 – 20
2. 30 – 40
3. 50 – 60
4. 70 – 80

Question Number : 85 Question Id : 562303285 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ of a soil or rock is the ratio of volume of water it will retain after saturation against the force gravity to its own volume.

Options :

1. Specific saturation
2. Specific retention
- 3.

Specific capacity

4. Specific volume

Question Number : 85 Question Id : 562303285 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ of a soil or rock is the ratio of volume of water it will retain after saturation against the force gravity to its own volume.

Options :

1. Specific saturation

2. Specific retention

3. Specific capacity

4. Specific volume

Question Number : 86 Question Id : 562303286 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

A measure of whether a groundwater flow tends towards laminar or turbulent behaviour is expressed by

Options :

1. Darcy's velocity

2. Bernoulli equation

3. Reynolds number

4. Theis equation

Question Number : 86 Question Id : 562303286 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

A measure of whether a groundwater flow tends towards laminar or turbulent behaviour is expressed by

Options :

1. Darcy's velocity
2. Bernoulli equation
3. Reynolds number
4. Theis equation

Question Number : 87 Question Id : 562303287 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The horizontal plane at some depth within the unsaturated zone that separates upward and downward moving water

Options :

1. Zero flux plane
2. Boundary flux plane
3. Groundwater flux plane
4. Capillary fringe dividing plane

Question Number : 87 Question Id : 562303287 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The horizontal plane at some depth within the unsaturated zone that separates upward and downward moving water

Options :

1. Zero flux plane
2. Boundary flux plane
3. Groundwater flux plane
4. Capillary fringe dividing plane

Question Number : 88 Question Id : 562303288 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

With an aim to generate site specific 'Action plan' for scientific management of the natural resources in 1987, which department has launched this project Integrated Mission for Sustainable Development (IMSD) ?

Options :

1. Groundwater Survey and Development Agency
2. Drought Prone Area Programme, Maharashtra State
3. Department of Space, Govt. of India
4. Central Groundwater Board

Question Number : 88 Question Id : 562303288 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

With an aim to generate site specific 'Action plan' for scientific management of the natural resources in 1987, which department has launched this project Integrated Mission for Sustainable Development (IMSD) ?

Options :

1. Groundwater Survey and Development Agency
2. Drought Prone Area Programme, Maharashtra State
3. Department of Space, Govt. of India
4. Central Groundwater Board

Question Number : 89 Question Id : 562303289 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

An embankment of low height, generally made of earth material is termed as

Options :

1. Tank bund
2. Inverted bund
3. Escape bund
4. Breaching bund

Question Number : 89 Question Id : 562303289 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

An embankment of low height, generally made of earth material is termed as

Options :

- 1.

Tank bund

2. Inverted bund

3. Escape bund

4. Breaching bund

Question Number : 90 Question Id : 562303290 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

A hydrological entity in which water from all sides collect and passes through a single drain

Options :

1. Catchment

2. Aquifer

3. Hypsometric integer

4. None of the above

Question Number : 90 Question Id : 562303290 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

A hydrological entity in which water from all sides collect and passes through a single drain

Options :

1. Catchment

2. Aquifer

- 3. Hypsometric integer
- 4. None of the above

Question Number : 91 Question Id : 562303291 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The lines joining all points in a basin of some key time elements in a storm, such as beginning of precipitation are called

Options :

- 1. Isochrones
- 2. Monochrome
- 3. Lamination
- 4. Hydrophobia

Question Number : 91 Question Id : 562303291 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The lines joining all points in a basin of some key time elements in a storm, such as beginning of precipitation are called

Options :

- 1. Isochrones
- 2. Monochrome
- 3. Lamination
- 4.

Hydrophobia

Question Number : 92 Question Id : 562303292 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ represents the long term average annual recharge under the condition of maximum groundwater use. Under this condition the basin area forms the recharge area and groundwater discharge occurs only through the pumping wells.

Options :

1. Static reserve
2. Millennium reserve
3. Dynamic reserve
4. Portable reserve

Question Number : 92 Question Id : 562303292 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

_____ represents the long term average annual recharge under the condition of maximum groundwater use. Under this condition the basin area forms the recharge area and groundwater discharge occurs only through the pumping wells.

Options :

1. Static reserve
2. Millennium reserve
3. Dynamic reserve
4. Portable reserve

Question Number : 93 Question Id : 562303293 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

As per the Maharashtra Groundwater Act, 2009, compulsory registration of drilling rig owners and operators should be done with which authority ?

Options :

1. Directorate of Geology and Mining
2. Groundwater Survey and Development Agency
3. State Watershed Management Council
4. State Water Resource Department

Question Number : 93 Question Id : 562303293 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

As per the Maharashtra Groundwater Act, 2009, compulsory registration of drilling rig owners and operators should be done with which authority ?

Options :

1. Directorate of Geology and Mining
2. Groundwater Survey and Development Agency
3. State Watershed Management Council
4. State Water Resource Department

Question Number : 94 Question Id : 562303294 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

As per the Section 22 in the Maharashtra Groundwater (Development and Management) Draft Rules 2018 the provision of

Options :

1. Meetings of Watershed Management Committee
2. Regulation of Extraction of water from the wells in water scarcity areas
3. Prohibition of extraction of water from an existing well for a certain period
4. Protection of drinking water sources against contamination

Question Number : 94 Question Id : 562303294 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

As per the Section 22 in the Maharashtra Groundwater (Development and Management) Draft Rules 2018 the provision of

Options :

1. Meetings of Watershed Management Committee
2. Regulation of Extraction of water from the wells in water scarcity areas
3. Prohibition of extraction of water from an existing well for a certain period
4. Protection of drinking water sources against contamination

Question Number : 95 Question Id : 562303295 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which technique is used to stop groundwater movement and increase the sustainability of groundwater ?

Options :

1. Jackwell techniques
2. Artificial recharge by borewell injection
3. Fracture seal cementation
4. None of these

Question Number : 95 Question Id : 562303295 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Which technique is used to stop groundwater movement and increase the sustainability of groundwater ?

Options :

1. Jackwell techniques
2. Artificial recharge by borewell injection
3. Fracture seal cementation
4. None of these

Question Number : 96 Question Id : 562303296 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Prioritisation of areas for artificial recharge is normally done by overlaying _____ depth to water level maps with maps depicting the long term trend of groundwater levels. Normally areas having deeper water levels and declining water level trends are given higher priority identification of area feasible for artificial recharge.

Options :

1. Post monsoon
2. Pre monsoon
3. Mid monsoon
4. Seasonal

Question Number : 96 Question Id : 562303296 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Prioritisation of areas for artificial recharge is normally done by overlaying _____ depth to water level maps with maps depicting the long term trend of groundwater levels. Normally areas having deeper water levels and declining water level trends are given higher priority identification of area feasible for artificial recharge.

Options :

1. Post monsoon
2. Pre monsoon
3. Mid monsoon
4. Seasonal

Question Number : 97 Question Id : 562303297 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In areas where shallow subsurface strata restrict the downward passage of water, these recharge structures effectively reach materials with higher infiltration rates

Options :

- 1.

Ditch and furrow method

2. Channel spreading method

3. Pit method

4. Infiltration bed method

Question Number : 97 Question Id : 562303297 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

In areas where shallow subsurface strata restrict the downward passage of water, these recharge structures effectively reach materials with higher infiltration rates

Options :

1. Ditch and furrow method

2. Channel spreading method

3. Pit method

4. Infiltration bed method

Question Number : 98 Question Id : 562303298 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The metallic elements such as ferric ions are soluble as cations in _____ groundwater.

Options :

1. Alkaline

2. Saline

3. Acidic

4. Hard

Question Number : 98 Question Id : 562303298 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The metallic elements such as ferric ions are soluble as cations in _____ groundwater.

Options :

1. Alkaline

2. Saline

3. Acidic

4. Hard

Question Number : 99 Question Id : 562303299 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The groundwater contamination scenario can be segregated into two categories mainly point source and nonpoint source. Hence _____ is a example of non-point source.

Options :

1. Landfill

2. Petroleum refinery locations

3.

Agricultural activities

4. Chemical manufacturing locations

Question Number : 99 Question Id : 562303299 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

The groundwater contamination scenario can be segregated into two categories mainly point source and nonpoint source. Hence _____ is a example of non-point source.

Options :

1. Landfill
2. Petroleum refinery locations
3. Agricultural activities
4. Chemical manufacturing locations

Question Number : 100 Question Id : 562303300 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Organic liquids that are immiscible because of their non polar nature will also dissolve in water to some extent, even though the bulk of their volume will remain in a separate liquid phase for long periods of time. Such liquids are called

Options :

1. Non aqueous phase liquids
2. Aqueous phase liquids
3. Hydrophilic phase liquids

4. Hygroscopic phase liquids

Question Number : 100 Question Id : 562303300 Question Type : MCQ Option Shuffling : No Correct Marks : 2 Wrong Marks : 0.5

Organic liquids that are immiscible because of their non polar nature will also dissolve in water to some extent, even though the bulk of their volume will remain in a separate liquid phase for long periods of time. Such liquids are called

Options :

1. Non aqueous phase liquids

2. Aqueous phase liquids

3. Hydrophilic phase liquids

4. Hygroscopic phase liquids
