Question Number : 1 Question Id : 1505611 Question Type : MCQ Option Shuffling : No

Government has granted 'in-principle' approval to a total of 17 National Investment and Manufacturing Zones (NIMZs). Which of the following NIMZs are located outside the Delhi-Mumbai Industrial Corridor region ?

- A. Nagpur, Maharashtra
- B. Chittoor, Andhra Pradesh
- C. Kolar, Karnataka
- D. Nashik, Maharashtra

Options :

1. Only A, B, C
2. Only B, C, D
3. Only A, B, D
4. All of the above

Question Number : 1 Question Id : 1505611 Question Type : MCQ Option Shuffling : No

सरकारने एकूण 17 राष्ट्रीय गुंतवणूक आणि उत्पादन क्षेत्रांना (NIMZs) 'तत्त्वतः' मान्यता दिली आहे. पुढीलपैकी कोणते NIMZs दिल्ली-मुंबई औद्योगिक कॉरीडोर क्षेत्राबाहेर आहेत ?

- अ. नागपुर, महाराष्ट्र
- ब. चित्तूर, आंध्र प्रदेश
- क. कोलार, कर्नाटक
- ड. नाशिक, महाराष्ट्र

Options :

- 1. फक्त अ, ब, क
- 2. फक्त ब, क, ड
- 3. फक्त अ, ब, ड
- 4. वरीलपैकी सर्व

Question Number : 2 Question Id : 1505612 Question Type : MCQ Option Shuffling : No

Select the correct statement/s about Uttar Pradesh Lokayukta and Up-Lokayukta (Amendment-Bill, 2024).

- A. The Bill changes the term of office for Lokayukta and Up-Lokayukta from eight years to six years.
- B. The maximum age limit for holding the office has been increased from 65 to 70 years.

Options :

- 1. Only A
- 2. Only B
- 3. Both A and B
- 4. None of the above

Question Number : 2 Question Id : 1505612 Question Type : MCQ Option Shuffling : No

उत्तर प्रदेश लोकायुक्त व उप-लोकायुक्त (दुरुस्ती-विधेयक, 2024) बाबत योग्य कथन/ने ओळखा.

- अ. या विधेयकामुळे लोकायुक्त व उप-लोकायुक्त यांचा कार्यकाळ आठ वर्षांवरून सहा वर्षांपर्यंत बदललेला आहे.
- ब. या पदावर राहण्यासाठी कमाल वयोमर्यादा 65 वरून 70 वर्षांपर्यंत वाढविण्यात आली आहे.

Options :

- 1. फक्त अ
- 2. फक्त ब
- 3. अ व ब दोन्ही

4. वरीलपैकी एकही नाही

Question Number : 3 Question Id : 1505613 Question Type : MCQ Option Shuffling : No

Manipur ranks _____ regarding the total time spent under Presidential rule.

Options :

1. Second
2. Third
3. Fourth
4. Fifth

Question Number : 3 Question Id : 1505613 Question Type : MCQ Option Shuffling : No

राष्ट्रपती राजवटीच्या एकूण कालावधीच्या बाबतीत मणिपुर _____ क्रमांकावर आहे.

Options :

1. दुसऱ्या
2. तिसऱ्या
3. चौथ्या
4. पाचव्या

Question Number : 4 Question Id : 1505614 Question Type : MCQ Option Shuffling : No

Who among the following is not a recipient of the National Dhanvantari Ayurveda Award declared in February 2025 ?

Options :

1. Vaidya Tarachand Sharma
2. Vaidya Maya Ram Uniyal
3. Vaidya Sameer Govind Jamadagni
4. Vaidya Pandharinath Joshi

Question Number : 4 Question Id : 1505614 Question Type : MCQ Option Shuffling : No

खालीलपैकी कोणाला फेब्रुवारी 2025 मध्ये जाहीर झालेला राष्ट्रीय धन्वंतरी आयुर्वेद पुरस्कार मिळाला नाही ?

Options :

1. वैद्य ताराचंद शर्मा
2. वैद्य माया राम उनियाल
3. वैद्य समीर गोविंद जमदग्नी
4. वैद्य पंढरीनाथ जोशी

Question Number : 5 Question Id : 1505615 Question Type : MCQ Option Shuffling : No

Which Indian State became the first fully Digital Banking State in the country ?

Options :

1. Punjab
2. Kerala
3. Tamil Nadu
4. Andhra Pradesh

Question Number : 5 Question Id : 1505615 Question Type : MCQ Option Shuffling : No

कोणते भारतीय राज्य देशातील पहिले पूर्णपणे डिजीटल बँकींग राज्य बनले आहे ?

Options :

1. पंजाब
2. केरळ
3. तामिळनाडू
4. आंध्र प्रदेश

Question Number : 6 Question Id : 1505616 Question Type : MCQ Option Shuffling : No

Select the correct statement/s from the following.

- A. The theme of 11th International Science Congress was “Global Green, Growth and Green Economy”.
- B. The 11th International Science Congress was organised on December, 2023 at Udaipur.
- C. The 13th International Science Congress will be organise on December, 2025 at Ayodhya (Uttar Pradesh).

Options :

1. Only A is correct
2. Only B is correct

3. Both A and B are correct
4. Both B and C are correct

Question Number : 6 Question Id : 1505616 Question Type : MCQ Option Shuffling : No

खालीलपैकी योग्य कथन/ने ओळखा.

- अ. 11 व्या आंतरराष्ट्रीय विज्ञान काँग्रेसची थीम “ग्लोबल ग्रीन, ग्रोथ आणि ग्रीन इकॉनॉमी” होती.
- ब. 11 व्या आंतरराष्ट्रीय विज्ञान काँग्रेसचे आयोजन डिसेंबर, 2023 रोजी उदयपूर येथे करण्यात आले होते.
- क. 13 व्या आंतरराष्ट्रीय विज्ञान काँग्रेसचे आयोजन डिसेंबर, 2025 रोजी अयोध्या (उत्तर प्रदेश) येथे करण्यात येणार आहे.

Options :

1. फक्त अ बरोबर
2. फक्त ब बरोबर
3. अ व ब दोन्ही बरोबर
4. ब व क दोन्ही बरोबर

Question Number : 7 Question Id : 1505617 Question Type : MCQ Option Shuffling : No

Select the correct statement/s from the following.

- A. In the World Press Freedom Index Report 2024, Norway, Denmark and Sweden maintain 1st, 2nd and 3rd ranks respectively.
- B. India's position has been slightly improved moving from 161 to 159 in World Press Freedom Index Report 2024.
- C. Eritrea is at the bottom of the list of World Press Freedom Index Report 2024.

Options :

1. Only A, C
2. Only A, B
3. Only B, C
4. All of the above

Question Number : 7 Question Id : 1505617 Question Type : MCQ Option Shuffling : No

खालीलपैकी योग्य कथन/ने ओळखा.

- अ. जागतिक प्रेस स्वातंत्र्य निर्देशांक अहवाल 2024 मध्ये नॉर्वे, डेन्मार्क आणि स्विडन ने अनुक्रमे पहिले, दुसरे आणि तिसरे स्थान राखले आहे.

- क. जागतिक प्रेस स्वातंत्र्य निर्देशांक अहवाल 2024 मध्ये इरीट्रीया या यादीत तळस्थानी आहे.

Options :

1. फक्त अ, क
2. फक्त अ, ब
3. फक्त ब, क
4. वरीलपैकी सर्व

Question Number : 8 Question Id : 1505618 Question Type : MCQ Option Shuffling : No

Match the pairs (Sahitya Akademi Awards, 2024).

‘A’ (Books)

‘B’ (Authors)

A. Swrni Thakhai

i. Mukesh Thali

B. Spirit Nights

ii. Gagan Gill

C. Main Jab Tak Aai Bahar

iii. Easterine Kire

D. Rang Tarang

iv. Aron Raja

Options :

1. A – i B – iii C – iv D – ii
2. A – iv B – iii C – ii D – i
3. A – iii B – iv C – i D – ii
4. A – i B – ii C – iv D – iii

Question Number : 8 Question Id : 1505618 Question Type : MCQ Option Shuffling : No

जोड्या लावा (साहित्य अकादमी पुरस्कार, 2024).

‘अ’ (ग्रंथ)

‘ब’ (लेखक)

अ. स्वर्णी थकाई

i. मुकेश थाली

ब. स्पीरिट नाईट्स

ii. गगन गिल

क. मैं जब तक आई बाहर

iii. ईस्टरीन कीरे

ड. रंग तरंग

iv. आरोन राजा

Options :

1. अ – i ब – iii क – iv ड – ii

2. अ – iv ब – iii क – ii ड – i

3. अ – iii ब – iv क – i ड – ii

4. अ – i ब – ii क – iv ड – iii

Question Number : 9 Question Id : 1505619 Question Type : MCQ Option Shuffling : No

Which of the following State Governments has approved the Agriculture – Artificial Intelligence Policy in June 2025 ?

Options :

1. Maharashtra

2. Punjab

3. Madhya Pradesh

4. Andhra Pradesh

Question Number : 9 Question Id : 1505619 Question Type : MCQ Option Shuffling : No

जून 2025 मध्ये खालीलपैकी कोणत्या राज्य सरकारने कृषि-कृत्रिम बुद्धिमत्ता धोरणाला मान्यता दिली ?

Options :

1. महाराष्ट्र

2. पंजाब

3. मध्य प्रदेश

4. आंध्र प्रदेश

Question Number : 10 Question Id : 15056110 Question Type : MCQ Option Shuffling : No

What was the theme of Republic Day 2025 ?

Options :

1. Golden India – Heritage and Development
2. Golden India – Culture and Technology
3. Modern India – Heritage and Development
4. Modern India – Culture and Technology

Question Number : 10 Question Id : 15056110 Question Type : MCQ Option Shuffling : No

प्रजासत्ताक दिन 2025 ची थीम काय होती ?

Options :

1. स्वर्णीम भारत – वारसा आणि विकास
2. स्वर्णीम भारत – संस्कृती आणि तंत्रज्ञान
3. आधुनिक भारत – वारसा आणि विकास
4. आधुनिक भारत – संस्कृती आणि तंत्रज्ञान

Question Number : 11 Question Id : 15056111 Question Type : MCQ Option Shuffling : No

The Right to Information Act, 2005 consists of how many Chapters in all ?

Options :

1. Six
2. Eight
3. Five
4. Seven

Question Number : 11 Question Id : 15056111 Question Type : MCQ Option Shuffling : No

माहितीचा अधिकार अधिनियम, 2005 मध्ये एकूण किती प्रकरणे आहेत ?

Options :

1. सहा
2. आठ
3. पाच
4. सात

Question Number : 12 Question Id : 15056112 Question Type : MCQ Option Shuffling : No

As per Section 12 of the Right to Information Act, 2005, the Chief Information Commissioner shall be appointed by the President on the recommendation of Committee consisting of the _____, who shall be the Chairperson of the Committee.

Options :

1. Finance Minister

Question Shuffling Allowed :

Yes

Question Number : 13 Question Id : 15056113 Question Type : MCQ Option Shuffling : No

The sausar group rocks in Maharashtra are present in the districts of _____.

Options :

1. Sindhudurg and Ratnagiri
2. Nagpur and Amravati
3. Nagpur and Bhandara
4. Wardha and Akola

Question Number : 13 Question Id : 15056113 Question Type : MCQ Option Shuffling : No

The sausal group rocks in Maharashtra are present in the districts of _____.

Options :

1. Sindhudurg and Ratnagiri
2. Nagpur and Amravati
3. Nagpur and Bhandara
4. Wardha and Akola

Question Number : 14 Question Id : 15056114 Question Type : MCQ Option Shuffling : No

The marine Bagh beds are _____ than Deccan traps and are called as _____.

Options :

1. older, intertrappean
2. older, infratrappean
3. younger, intertrappean
4. younger, intratrappean

Question Number : 14 Question Id : 15056114 Question Type : MCQ Option Shuffling : No

The marine Bagh beds are _____ than Deccan traps and are called as _____.

Options :

1. older, intertrappean
2. older, infratrappean
3. younger, intertrappean
4. younger, intratrappean

Question Number : 15 Question Id : 15056115 Question Type : MCQ Option Shuffling : No

The _____ fossils are characteristic of main limestone of _____ beds.

Options :

1. Dinosaurs, Bagh

2. Dinosaurs, Lameta
3. Equus, Bagh
4. Equus, Lameta

Question Number : 15 Question Id : 15056115 Question Type : MCQ Option Shuffling : No

The _____ fossils are characteristic of main limestone of _____ beds.

Options :

1. Dinosaurs, Bagh
2. Dinosaurs, Lameta
3. Equus, Bagh
4. Equus, Lameta

Question Number : 16 Question Id : 15056116 Question Type : MCQ Option Shuffling : No

The course of Varna river in Kolhapur district represents a fault in the _____ basement.

Options :

1. Infratrappean
2. Archaeans
3. Proterozoic
4. Intratrappean

Question Number : 16 Question Id : 15056116 Question Type : MCQ Option Shuffling : No

The course of Varna river in Kolhapur district represents a fault in the _____ basement.

Options :

1. Infratrappean
2. Archaeans
3. Proterozoic
4. Intratrappean

Question Number : 17 Question Id : 15056117 Question Type : MCQ Option Shuffling : No

The stratigraphic succession of Deccan Basalt Group is divided in _____ subgroups which consist of _____ formations.

Options :

1. 3, 12
2. 3, 13
3. 3, 11
4. 3, 14

Question Number : 17 Question Id : 15056117 Question Type : MCQ Option Shuffling : No

The stratigraphic succession of Deccan Basalt Group is divided in _____ subgroups which consist of _____ formations.

Options :

1. 3, 12
2. 3, 13
3. 3, 11
4. 3, 14

Question Number : 18 Question Id : 15056118 Question Type : MCQ Option Shuffling : No

Which of the following features has been noticed in the Lonar lake located in Buldhana district of Maharashtra ?

Options :

1. Circular depression
2. Absence of a central pipe/vent/abnormal fractures
3. Lava flows of basalts appears to dip away from rim
4. All of the above

Question Number : 18 Question Id : 15056118 Question Type : MCQ Option Shuffling : No

Which of the following features has been noticed in the Lonar lake located in Buldhana district of Maharashtra ?

Options :

1. Circular depression
2. Absence of a central pipe/vent/abnormal fractures
3. Lava flows of basalts appears to dip away from rim
4. All of the above

Question Number : 19 Question Id : 15056119 Question Type : MCQ Option Shuffling : No

The extinct gastropod commonly found in intertrappean beds in Vidarbha region is _____.

Options :

1. Bullinus
2. Rana
3. Natica
4. Patella

Question Number : 19 Question Id : 15056119 Question Type : MCQ Option Shuffling : No

The extinct gastropod commonly found in intertrappean beds in Vidarbha region is _____.

Options :

1. Bullinus
2. Rana
3. Natica
4. Patella

Question Number : 20 Question Id : 15056120 Question Type : MCQ Option Shuffling : No

Purana sediments of Kolhapur and Sindhudurg districts are famously recognised as _____ supergroup.

Options :

1. Cuddapah
2. Kaladgi
3. Dharwar

4. Vindhyan

Question Number : 20 Question Id : 15056120 Question Type : MCQ Option Shuffling : No

Purana sediments of Kolhapur and Sindhudurg districts are famously recognised as _____ supergroup.

Options :

1. Cuddapah
2. Kaladgi
3. Dharwar
4. Vindhyan

Question Number : 21 Question Id : 15056121 Question Type : MCQ Option Shuffling : No

The dykes in Deccan Basalts are considered as post-lava _____.

Options :

1. hypabyssal segregations
2. volcanic injections
3. hypabyssal injections
4. volcanic pipes

Question Number : 21 Question Id : 15056121 Question Type : MCQ Option Shuffling : No

The dykes in Deccan Basalts are considered as post-lava _____.

Options :

1. hypabyssal segregations
2. volcanic injections
3. hypabyssal injections
4. volcanic pipes

Question Number : 22 Question Id : 15056122 Question Type : MCQ Option Shuffling : No

Both the sakoli and sausar super group of rocks are generally assigned the age group as _____.

Options :

1. Proterozoic (540-2500 m.yrs)

2. Archaean (2500-3500 m.yrs)
3. Permian (245-295 m.yrs)
4. Upper carboniferous (295-360 m.yrs)

Question Number : 22 Question Id : 15056122 Question Type : MCQ Option Shuffling : No

Both the sakoli and sausar super group of rocks are generally assigned the age group as _____.

Options :

1. Proterozoic (540-2500 m.yrs)
2. Archaean (2500-3500 m.yrs)
3. Permian (245-295 m.yrs)
4. Upper carboniferous (295-360 m.yrs)

Question Number : 23 Question Id : 15056123 Question Type : MCQ Option Shuffling : No

The intertrappean beds in Mumbai region have animal fossils. Because of abundance of _____ remains, these beds are called as _____.

Options :

1. frog, amphibian beds
2. frog, fluvial beds
3. frog, frog beds
4. frog, animal beds

Question Number : 23 Question Id : 15056123 Question Type : MCQ Option Shuffling : No

The intertrappean beds in Mumbai region have animal fossils. Because of abundance of _____ remains, these beds are called as _____.

Options :

1. frog, amphibian beds
2. frog, fluvial beds
3. frog, frog beds
4. frog, animal beds

Question Number : 24 Question Id : 15056124 Question Type : MCQ Option Shuffling : No

The Laterites of Maharashtra, that occur as cappings over Deccan Trap basaltic rocks are generally assigned age as _____.

Options :

1. Miocene – Pliocene
2. Recent – Pleistocene
3. Eocene – Upper cretaceous
4. Eocene – Jurassic

Question Number : 24 Question Id : 15056124 Question Type : MCQ Option Shuffling : No

The Laterites of Maharashtra, that occur as cappings over Deccan Trap basaltic rocks are generally assigned age as _____.

Options :

1. Miocene – Pliocene
2. Recent – Pleistocene
3. Eocene – Upper cretaceous
4. Eocene – Jurassic

Question Number : 25 Question Id : 15056125 Question Type : MCQ Option Shuffling : No

The exposures of Gondwana supergroup rocks occur in _____ and _____ valleys in Maharashtra.

Options :

1. Kanhan, Wardha
2. Koel, Damodar
3. Amravati, Cauvery
4. Vaitarna, Ulhas

Question Number : 25 Question Id : 15056125 Question Type : MCQ Option Shuffling : No

The exposures of Gondwana supergroup rocks occur in _____ and _____ valleys in Maharashtra.

Options :

1. Kanhan, Wardha
2. Koel, Damodar

3. Amravati, Cauvery

4. Vaitarna, Ulhas

Question Number : 26 Question Id : 15056126 Question Type : MCQ Option Shuffling : No

In case of the rock, amygdaloidal basalt, the term amygdule refers to

Options :

1. Presence of vesicles in the rock
2. Presence of large phenocrysts in rock
3. Presence of vesicles filled by secondary minerals
4. The weathered condition of the rock

Question Number : 26 Question Id : 15056126 Question Type : MCQ Option Shuffling : No

In case of the rock, amygdaloidal basalt, the term amygdule refers to

Options :

1. Presence of vesicles in the rock
2. Presence of large phenocrysts in rock
3. Presence of vesicles filled by secondary minerals
4. The weathered condition of the rock

Question Number : 27 Question Id : 15056127 Question Type : MCQ Option Shuffling : No

The geographic direction given by the line of intersection of a horizontal plane with a bedding plane of layer of rock is known as _____.

Options :

1. Strike of bed
2. Dip of bed
3. Plunge of bed
4. Hade of bed

Question Number : 27 Question Id : 15056127 Question Type : MCQ Option Shuffling : No

The geographic direction given by the line of intersection of a horizontal plane with a bedding plane of layer of rock is known as _____.

Options :

1. Strike of bed

2. Dip of bed
3. Plunge of bed
4. Hade of bed

Question Number : 28 Question Id : 15056128 Question Type : MCQ Option Shuffling : No

The general principal type of folding are _____.

Options :

1. Flexure folding
2. Shear folding
3. Flow folding
4. All of the above

Question Number : 28 Question Id : 15056128 Question Type : MCQ Option Shuffling : No

The general principal type of folding are _____.

Options :

1. Flexure folding
2. Shear folding
3. Flow folding
4. All of the above

Question Number : 29 Question Id : 15056129 Question Type : MCQ Option Shuffling : No

The criteria for the recognition of faults are _____.

Options :

1. Discontinuity of structures
2. Repetition or omission of strata
3. Sudden changes of sedimentary facies
4. All of the above

Question Number : 29 Question Id : 15056129 Question Type : MCQ Option Shuffling : No

The criteria for the recognition of faults are _____.

Options :

1. Discontinuity of structures
2. Repetition or omission of strata
3. Sudden changes of sedimentary facies
4. All of the above

Question Number : 30 Question Id : 15056130 Question Type : MCQ Option Shuffling : No

A dip slip fault is the one in which _____.

Options :

1. Dip of fault plane is parallel to the dip of beds
2. Dip of fault plane is perpendicular to the dip of beds
3. Relative movement is parallel to the dip of fault plane
4. Relative movement is parallel to the dip of fault plane

Question Number : 30 Question Id : 15056130 Question Type : MCQ Option Shuffling : No

A dip slip fault is the one in which _____.

Options :

1. Dip of fault plane is parallel to the dip of beds
2. Dip of fault plane is perpendicular to the dip of beds
3. Relative movement is parallel to the dip of fault plane
4. Relative movement is parallel to the dip of fault plane

Question Number : 31 Question Id : 15056131 Question Type : MCQ Option Shuffling : No

Identify the discordant igneous intrusion out of the following.

Options :

1. Sill
2. Batholith
3. Laccolith
4. Dyke

Question Number : 31 Question Id : 15056131 Question Type : MCQ Option Shuffling : No

Identify the discordant igneous intrusion out of the following.

Options :

1. Sill
2. Batholith
3. Laccolith
4. Dyke

Question Number : 32 Question Id : 15056132 Question Type : MCQ Option Shuffling : No

_____ are the composite folds having two hinges and three planar limbs, in which the central limb is essentially flattened in some cases giving a typical box-like appearance to the fold.

Options :

1. Chevron folds
2. Cuspate folds
3. Concentric folds
4. Conjugate folds

Question Number : 32 Question Id : 15056132 Question Type : MCQ Option Shuffling : No

_____ are the composite folds having two hinges and three planar limbs, in which the central limb is essentially flattened in some cases giving a typical box-like appearance to the fold.

Options :

1. Chevron folds
2. Cuspate folds
3. Concentric folds
4. Conjugate folds

Question Number : 33 Question Id : 15056133 Question Type : MCQ Option Shuffling : No

A strike-slip fault is one in which the net slip is parallel to the strike of the fault. The strike equals the net slip and there is no dip-slip component.

The rake of the net slip will be _____.

Options :

1. zero
2. one

3. two
4. none of the above

Question Number : 33 Question Id : 15056133 Question Type : MCQ Option Shuffling : No

A strike-slip fault is one in which the net slip is parallel to the strike of the fault. The strike equals the net slip and there is no dip-slip component.

The rake of the net slip will be _____.

Options :

1. zero
2. one
3. two
4. none of the above

Question Number : 34 Question Id : 15056134 Question Type : MCQ Option Shuffling : No

The causes of fracturing and formation of joints could be _____.

Options :

1. Tectonic stresses and residual stresses
2. Contraction due to shrinkage during cooling and surfacial movements
3. Both (1) and (2) of the above
4. None of the above

Question Number : 34 Question Id : 15056134 Question Type : MCQ Option Shuffling : No

The causes of fracturing and formation of joints could be _____.

Options :

1. Tectonic stresses and residual stresses
2. Contraction due to shrinkage during cooling and surfacial movements
3. Both (1) and (2) of the above
4. None of the above

Question Number : 35 Question Id : 15056135 Question Type : MCQ Option Shuffling : No

Strike slip faults are those in which the displacement is chiefly parallel to the strike of the fault. They are also called as _____.

Options :

1. Wrench fault
2. Transcurrent fault
3. Transform fault
4. All of the above

Question Number : 35 Question Id : 15056135 Question Type : MCQ Option Shuffling : No

Strike slip faults are those in which the displacement is chiefly parallel to the strike of the fault. They are also called as _____.

Options :

1. Wrench fault
2. Transcurrent fault
3. Transform fault
4. All of the above

Question Number : 36 Question Id : 15056136 Question Type : MCQ Option Shuffling : No

In this type of folds the hinge line is parallel to the dip direction of the axial surface and the fold closes sideways : _____.

Options :

1. Synformal Anticline folds
2. Conjugate folds
3. Neutral folds
4. Recumbent folds

Question Number : 36 Question Id : 15056136 Question Type : MCQ Option Shuffling : No

In this type of folds the hinge line is parallel to the dip direction of the axial surface and the fold closes sideways : _____.

Options :

1. Synformal Anticline folds
2. Conjugate folds
3. Neutral folds

4. Recumbent folds

Question Number : 37 Question Id : 15056137 Question Type : MCQ Option Shuffling : No

Identify the concordant igneous intrusion out of the following.

Options :

1. Dyke
2. Batholith
3. Volcanic neck
4. Laccoliths

Question Number : 37 Question Id : 15056137 Question Type : MCQ Option Shuffling : No

Identify the concordant igneous intrusion out of the following.

Options :

1. Dyke
2. Batholith
3. Volcanic neck
4. Laccoliths

Question Number : 38 Question Id : 15056138 Question Type : MCQ Option Shuffling : No

Which type of fold is characterized by a sharp and angular hinge ?

Options :

1. Chevron fold
2. Box fold
3. Kink fold
4. Monocline fold

Question Number : 38 Question Id : 15056138 Question Type : MCQ Option Shuffling : No

Which type of fold is characterized by a sharp and angular hinge ?

Options :

1. Chevron fold
2. Box fold

3. Kink fold
4. Monocline fold

Question Number : 39 Question Id : 15056139 Question Type : MCQ Option Shuffling : No

Under some conditions of metamorphism, where shales and sandstones are interbedded the more plastic shale may be squeezed into inclined planes of cleavage that cut the sandstones. The resulting structure is _____.

Options :

1. Bedding cleavage
2. Cleavage banding
3. Bedding fissility
4. Schistosity

Question Number : 39 Question Id : 15056139 Question Type : MCQ Option Shuffling : No

Under some conditions of metamorphism, where shales and sandstones are interbedded the more plastic shale may be squeezed into inclined planes of cleavage that cut the sandstones. The resulting structure is _____.

Options :

1. Bedding cleavage
2. Cleavage banding
3. Bedding fissility
4. Schistosity

Question Number : 40 Question Id : 15056140 Question Type : MCQ Option Shuffling : No

A large sedimentary sequence that has moved over the underlying rocks over a great distance is termed as _____.

Options :

1. Recumbent fold
2. Nappe
3. Wrench fault

4. None of the above

Question Number : 40 Question Id : 15056140 Question Type : MCQ Option Shuffling : No

A large sedimentary sequence that has moved over the underlying rocks over a great distance is termed as _____.

Options :

1. Recumbent fold
2. Nappe
3. Wrench fault
4. None of the above

Question Number : 41 Question Id : 15056141 Question Type : MCQ Option Shuffling : No

The rich concentrates of REE are noticed with Nepheline-rich rocks, the main associated minerals are apatite, magnetite and phlogopite with minor amounts of Na-Pyroxene and amphiboles. Accessory phases are fluorite, perovskite, pyrochlore, monazite barite. These are intrusive in platform as ultramafies to alkali rocks and at times in rift systems. The rocks are _____

Options :

1. Granites
2. Syenites
3. Carbonatites
4. Gabbros

Question Number : 41 Question Id : 15056141 Question Type : MCQ Option Shuffling : No

The rich concentrates of REE are noticed with Nepheline-rich rocks, the main associated minerals are apatite, magnetite and phlogopite with minor amounts of Na-Pyroxene and amphiboles. Accessory phases are fluorite, perovskite, pyrochlore, monazite barite. These are intrusive in platform as ultramafies to alkali rocks and at times in rift systems. The rocks are _____

Options :

1. Granites
2. Syenites

3. Carbonatites

4. Gabbros

Question Number : 42 Question Id : 15056142 Question Type : MCQ Option Shuffling : No

A prominent plug intruded into tholeiitic basalt showing layered gabbro intruded by granophyre is well known at _____.

Options :

1. Ambadongar

2. Phenai Mata

3. Mandla

4. Rajpipla

Question Number : 42 Question Id : 15056142 Question Type : MCQ Option Shuffling : No

A prominent plug intruded into tholeiitic basalt showing layered gabbro intruded by granophyre is well known at _____.

Options :

1. Ambadongar

2. Phenai Mata

3. Mandla

4. Rajpipla

Question Number : 43 Question Id : 15056143 Question Type : MCQ Option Shuffling : No

The Deccan trap volcanism mainly characterizes three polarity sequence described as _____.

Options :

1. Three normal, six reversals

2. Two reversals followed by normal

3. One normal between two reversals

4. One reversal between two normals

Question Number : 43 Question Id : 15056143 Question Type : MCQ Option Shuffling : No

The Deccan trap volcanism mainly characterizes three polarity sequence described as _____.

Options :

1. Three normal, six reversals
2. Two reversals followed by normal
3. One normal between two reversals
4. One reversal between two normals

Question Number : 44 Question Id : 15056144 Question Type : MCQ Option Shuffling : No

In case of _____ vertically acting stress of the overlying rock-masses and the high temperature that prevails underneath, at great depths, act together to bring about mineralogical and textural changes in the deep-seated rock bodies.

Options :

1. Regional Metamorphism
2. Cataclastic Metamorphism
3. Thermal Metamorphism
4. Load Metamorphism

Question Number : 44 Question Id : 15056144 Question Type : MCQ Option Shuffling : No

In case of _____ vertically acting stress of the overlying rock-masses and the high temperature that prevails underneath, at great depths, act together to bring about mineralogical and textural changes in the deep-seated rock bodies.

Options :

1. Regional Metamorphism
2. Cataclastic Metamorphism
3. Thermal Metamorphism
4. Load Metamorphism

Question Number : 45 Question Id : 15056145 Question Type : MCQ Option Shuffling : No

Salher Formation consists of simple pahoehoe flows is overlain by _____ Formation comprising of compound flows of phryic type.

Options :

1. Diveghat
2. Ratangad
3. Indrayani
4. Elephanta

Question Number : 45 Question Id : 15056145 Question Type : MCQ Option Shuffling : No

Salher Formation consists of simple pahoehoe flows is overlain by _____
Formation comprising of compound flows of phyric type.

Options :

1. Diveghat
2. Ratangad
3. Indrayani
4. Elephanta

Question Number : 46 Question Id : 15056146 Question Type : MCQ Option Shuffling : No

Fossils of frogs, tortoise, cyprids, insects and fish tooth are widely reported
in the Deccan traps near Mumbai in the _____.

Options :

1. Inter-trappean beds
2. Infra-trappean beds
3. Intra-trappean beds
4. Supra-trappean beds

Question Number : 46 Question Id : 15056146 Question Type : MCQ Option Shuffling : No

Fossils of frogs, tortoise, cyprids, insects and fish tooth are widely reported
in the Deccan traps near Mumbai in the _____.

Options :

1. Inter-trappean beds
2. Infra-trappean beds
3. Intra-trappean beds

4. Supra-trappean beds

Question Number : 47 Question Id : 15056147 Question Type : MCQ Option Shuffling : No

Which amongst following is not an evaporite mineral ?

Options :

1. Anhydrite
2. Gypsum
3. Goethite
4. Sylvite

Question Number : 47 Question Id : 15056147 Question Type : MCQ Option Shuffling : No

Which amongst following is not an evaporite mineral ?

Options :

1. Anhydrite
2. Gypsum
3. Goethite
4. Sylvite

Question Number : 48 Question Id : 15056148 Question Type : MCQ Option Shuffling : No

When the phenocrysts in the Deccan basalt rocks under thin sections are observed to gather at one spot, the resulting texture is called _____.

Options :

1. Poikilitic
2. Glomero-porphyritic
3. Ophitic
4. Hyalopilitic

Question Number : 48 Question Id : 15056148 Question Type : MCQ Option Shuffling : No

When the phenocrysts in the Deccan basalt rocks under thin sections are observed to gather at one spot, the resulting texture is called _____.

Options :

1. Poikilitic

2. Glomero-porphyrific
3. Ophitic
4. Hyalopilitic

Question Number : 49 Question Id : 15056149 Question Type : MCQ Option Shuffling : No

The most common iron-rich cement is represented by the mineral _____.

Options :

1. Goethite
2. Hematite
3. Magnetite
4. Pyrrhotite

Question Number : 49 Question Id : 15056149 Question Type : MCQ Option Shuffling : No

The most common iron-rich cement is represented by the mineral _____.

Options :

1. Goethite
2. Hematite
3. Magnetite
4. Pyrrhotite

Question Number : 50 Question Id : 15056150 Question Type : MCQ Option Shuffling : No

In metamorphism, the change in solid rock composition resulting from hydrothermal fluid exchanging constituents with an outside source is called _____.

Options :

1. Metasomatism
2. Retrograde metamorphism
3. Prograde metamorphism
4. Contact metamorphism

Question Number : 50 Question Id : 15056150 Question Type : MCQ Option Shuffling : No

In metamorphism, the change in solid rock composition resulting from hydrothermal fluid exchanging constituents with an outside source is called _____.

Options :

1. Metasomatism
2. Retrograde metamorphism
3. Prograde metamorphism
4. Contact metamorphism

Question Number : 51 Question Id : 15056151 Question Type : MCQ Option Shuffling : No

The mean, mode and median in grain size distribution are often different and the degree of asymmetry is represented by _____.

Options :

1. Kurtosis
2. Moment asymmetry
3. Skewness
4. Phi break

Question Number : 51 Question Id : 15056151 Question Type : MCQ Option Shuffling : No

The mean, mode and median in grain size distribution are often different and the degree of asymmetry is represented by _____.

Options :

1. Kurtosis
2. Moment asymmetry
3. Skewness
4. Phi break

Question Number : 52 Question Id : 15056152 Question Type : MCQ Option Shuffling : No

The degree of similarity of particle sizes in clastic sediments is known as _____.

Options :

1. Standard Deviation
2. Skewness
3. Roundness
4. Sorting

Question Number : 52 Question Id : 15056152 Question Type : MCQ Option Shuffling : No

The degree of similarity of particle sizes in clastic sediments is known as _____.

Options :

1. Standard Deviation
2. Skewness
3. Roundness
4. Sorting

Question Number : 53 Question Id : 15056153 Question Type : MCQ Option Shuffling : No

The clast supported conglomerate are called as _____.

Options :

1. Para conglomerate
2. Ortho conglomerate
3. Oligomict conglomerate
4. Monomict conglomerate

Question Number : 53 Question Id : 15056153 Question Type : MCQ Option Shuffling : No

The clast supported conglomerate are called as _____.

Options :

1. Para conglomerate
2. Ortho conglomerate
3. Oligomict conglomerate
4. Monomict conglomerate

Question Number : 54 Question Id : 15056154 Question Type : MCQ Option Shuffling : No

Conversion of limestone to marble is an example of _____.

Options :

1. Dynamic metamorphism
2. Thermal metamorphism
3. Dynamothermal metamorphism
4. Plutonic metamorphism

Question Number : 54 Question Id : 15056154 Question Type : MCQ Option Shuffling : No

Conversion of limestone to marble is an example of _____.

Options :

1. Dynamic metamorphism
2. Thermal metamorphism
3. Dynamothermal metamorphism
4. Plutonic metamorphism

Question Number : 55 Question Id : 15056155 Question Type : MCQ Option Shuffling : No

If the rocks are composed of homogeneous bed with uniform resistance, which of the following drainage pattern will develop ?

- a. Trellis
- b. Dendritic
- c. Radial
- d. Centripetal

Options :

1. Only c
2. Only d
3. Only a
4. Only b

Question Number : 55 Question Id : 15056155 Question Type : MCQ Option Shuffling : No

If the rocks are composed of homogeneous bed with uniform resistance, which of the following drainage pattern will develop ?

- a. Trellis
- b. Dendritic
- c. Radial
- d. Centripetal

Options :

- 1. Only c
- 2. Only d
- 3. Only a
- 4. Only b

Question Number : 56 Question Id : 15056156 Question Type : MCQ Option Shuffling : No

Volcanic mountains are built up from the material ejected from the earth's crust includes _____.

- a. Molten lava and volcanic bomb
- b. Cinders and ashes
- c. Dust and liquid mud
- d. All of the above

Options :

- 1. a and c
- 2. b and c
- 3. Only d
- 4. Only a

Question Number : 56 Question Id : 15056156 Question Type : MCQ Option Shuffling : No

Volcanic mountains are built up from the material ejected from the earth's crust includes _____.

- a. Molten lava and volcanic bomb
- b. Cinders and ashes
- c. Dust and liquid mud
- d. All of the above

Options :

- 1. a and c
- 2. b and c
- 3. Only d
- 4. Only a

Question Number : 57 Question Id : 15056157 Question Type : MCQ Option Shuffling : No

Who has introduced structure, process and time as important controlling factors in the development of landforms ?

- a. R. J. Small
- b. J. T. Hack
- c. W. M. Davis
- d. W. D. Thornbury

Options :

- 1. Only c
- 2. Only a
- 3. Only b
- 4. Only d

Question Number : 57 Question Id : 15056157 Question Type : MCQ Option Shuffling : No

Who has introduced structure, process and time as important controlling factors in the development of landforms ?

- a. R. J. Small
- b. J. T. Hack
- c. W. M. Davis
- d. W. D. Thornbury

Options :

- 1. Only c
- 2. Only a
- 3. Only b
- 4. Only d

Question Number : 58 Question Id : 15056158 Question Type : MCQ Option Shuffling : No

Exogenetic processes include running water, rivers comes under which of the following processes ?

- a. Pluvial
- b. Fluvial
- c. Aeolian
- d. Marine

Options :

- 1. Only d
- 2. Only b
- 3. Only c
- 4. Only a

Question Number : 58 Question Id : 15056158 Question Type : MCQ Option Shuffling : No

Exogenetic processes include running water, rivers comes under which of the following processes ?

- a. Pluvial
- b. Fluvial
- c. Aeolian
- d. Marine

Options :

- 1. Only d
- 2. Only b
- 3. Only c
- 4. Only a

Question Number : 59 Question Id : 15056159 Question Type : MCQ Option Shuffling : No

Which of the following landform is a circular chains of coral reefs ?

- a. Fringing reef
- b. Atolls
- c. Barrier reef
- d. Great barrier reef

Options :

- 1. Only a
- 2. Only c
- 3. Only b
- 4. Only d

Question Number : 59 Question Id : 15056159 Question Type : MCQ Option Shuffling : No

Which of the following landform is a circular chains of coral reefs ?

- a. Fringing reef
- b. Atolls
- c. Barrier reef
- d. Great barrier reef

Options :

1. Only a
2. Only c
3. Only b
4. Only d

Question Number : 60 Question Id : 15056160 Question Type : MCQ Option Shuffling : No

Which of the following are used for calculating drainage density ?

- a. Stream length
- b. Stream order
- c. Basin perimeter
- d. Basin area

Options :

1. a, b and c
2. b and c
3. b, c and d
4. a and d

Question Number : 60 Question Id : 15056160 Question Type : MCQ Option Shuffling : No

Which of the following are used for calculating drainage density ?

- a. Stream length
- b. Stream order
- c. Basin perimeter
- d. Basin area

Options :

1. a, b and c
2. b and c
3. b, c and d
4. a and d

Question Number : 61 Question Id : 15056161 Question Type : MCQ Option Shuffling : No

Which of the following geomorphic processes is not a exogenic process ?

Options :

1. Weathering
2. Erosion
3. Aggradation
4. Diastrophism

Question Number : 61 Question Id : 15056161 Question Type : MCQ Option Shuffling : No

Which of the following geomorphic processes is not a exogenic process ?

Options :

1. Weathering
2. Erosion
3. Aggradation
4. Diastrophism

Question Number : 62 Question Id : 15056162 Question Type : MCQ Option Shuffling : No

Distributaries forms on the delta because _____

- a. Increase in velocity in lower reaches
- b. Down cutting of the stream
- c. It is a featureless plain
- d. Obstructions caused by the deposited alluvium

Options :

1. Only a and b
2. Only b
3. Only a and c
4. Only d

Question Number : 62 Question Id : 15056162 Question Type : MCQ Option Shuffling : No

Distributaries forms on the delta because _____

- a. Increase in velocity in lower reaches
- b. Down cutting of the stream
- c. It is a featureless plain
- d. Obstructions caused by the deposited alluvium

Options :

- 1. Only a and b
- 2. Only b
- 3. Only a and c
- 4. Only d

Question Number : 63 Question Id : 15056163 Question Type : MCQ Option Shuffling : No

The chief chemical weathering processes are _____

- a. Oxidation and hydration
- b. Hydrolysis and carbonation
- c. Solution
- d. All of the above

Options :

- 1. Only a
- 2. Only b and c
- 3. Only c
- 4. Only d

Question Number : 63 Question Id : 15056163 Question Type : MCQ Option Shuffling : No

The chief chemical weathering processes are _____

- a. Oxidation and hydration
- b. Hydrolysis and carbonation
- c. Solution
- d. All of the above

Options :

1. Only a
2. Only b and c
3. Only c
4. Only d

Question Number : 64 Question Id : 15056164 Question Type : MCQ Option Shuffling : No

Which one of the following portion of electromagnetic spectrum is not used in remote sensing ?

Options :

1. Visible region
2. 'X' rays
3. Microwave region
4. Infrared region

Question Number : 64 Question Id : 15056164 Question Type : MCQ Option Shuffling : No

Which one of the following portion of electromagnetic spectrum is not used in remote sensing ?

Options :

1. Visible region
2. 'X' rays
3. Microwave region
4. Infrared region

Question Number : 65 Question Id : 15056165 Question Type : MCQ Option Shuffling : No

Who pioneered the concept of delayed water table response approach in the year 1954 ?

Options :

1. Theis
2. Boulton

3. Kroszynski
4. Jacob

Question Number : 65 Question Id : 15056165 Question Type : MCQ Option Shuffling : No

Who pioneered the concept of delayed water table response approach in the year 1954 ?

Options :

1. Theis
2. Boulton
3. Kroszynski
4. Jacob

Question Number : 66 Question Id : 15056166 Question Type : MCQ Option Shuffling : No

In the vector data model a _____ entity implies that the geographical extents of the object are limited to a location, that can be specified by one set of XY co-ordinates.

Options :

1. Polygon
2. Point
3. Line
4. Hexagon

Question Number : 66 Question Id : 15056166 Question Type : MCQ Option Shuffling : No

In the vector data model a _____ entity implies that the geographical extents of the object are limited to a location, that can be specified by one set of XY co-ordinates.

Options :

1. Polygon
2. Point
3. Line

4. Hexagon

Question Number : 67 Question Id : 15056167 Question Type : MCQ Option Shuffling : No

The determination of the position of points on the earth's surface accounting for its curvature, rotation and gravitational field. This is called _____.

Options :

1. Geodetical surveying
2. Geocoding
3. Fourier analysis
4. Gray scales

Question Number : 67 Question Id : 15056167 Question Type : MCQ Option Shuffling : No

The determination of the position of points on the earth's surface accounting for its curvature, rotation and gravitational field. This is called _____.

Options :

1. Geodetical surveying
2. Geocoding
3. Fourier analysis
4. Gray scales

Question Number : 68 Question Id : 15056168 Question Type : MCQ Option Shuffling : No

The _____ method is based on the fact that elastic waves travel through different earth materials at different velocities.

Options :

1. Finite-element
2. Seismic refraction
3. Electrical resistivity
4. Resistance-network

Question Number : 68 Question Id : 15056168 Question Type : MCQ Option Shuffling : No

The _____ method is based on the fact that elastic waves travel through different earth materials at different velocities.

Options :

1. Finite-element
2. Seismic refraction
3. Electrical resistivity
4. Resistance-network

Question Number : 69 Question Id : 15056169 Question Type : MCQ Option Shuffling : No

What factors influence the variation in resistivity of subsurface layers in the electric resistivity method ?

- a. Moisture content
- b. Chemical composition
- c. Density

Options :

1. Only a and c
2. Only a and b
3. Only b and c
4. All of the above

Question Number : 69 Question Id : 15056169 Question Type : MCQ Option Shuffling : No

What factors influence the variation in resistivity of subsurface layers in the electric resistivity method ?

- a. Moisture content
- b. Chemical composition
- c. Density

Options :

1. Only a and c
2. Only a and b
3. Only b and c
4. All of the above

Question Number : 70 Question Id : 15056170 Question Type : MCQ Option Shuffling : No

Consider the following statements regarding the false colour composite :

- a. Blue colour is assigned to green radiation.
- b. Red colour is assigned to near infrared radiation.

Options :

- 1. Only statement a is correct
- 2. Only statement b is correct
- 3. Both statements are incorrect
- 4. Both statements are correct

Question Number : 70 Question Id : 15056170 Question Type : MCQ Option Shuffling : No

Consider the following statements regarding the false colour composite :

- a. Blue colour is assigned to green radiation.
- b. Red colour is assigned to near infrared radiation.

Options :

- 1. Only statement a is correct
- 2. Only statement b is correct
- 3. Both statements are incorrect
- 4. Both statements are correct

Question Number : 71 Question Id : 15056171 Question Type : MCQ Option Shuffling : No

Arrange the following spectral bands according to increasing wavelengths.

- a. Red
- b. Green
- c. Infrared
- d. Blue

Options :

- 1. a, b, c, d
- 2. d, b, a, c
- 3. d, c, b, a
- 4. a, c, b, d

Question Number : 71 Question Id : 15056171 Question Type : MCQ Option Shuffling : No

Arrange the following spectral bands according to increasing wavelengths.

- a. Red
- b. Green
- c. Infrared
- d. Blue

Options :

- 1. a, b, c, d
- 2. d, b, a, c
- 3. d, c, b, a
- 4. a, c, b, d

Question Number : 72 Question Id : 15056172 Question Type : MCQ Option Shuffling : No

The altitude of Geosynchronous satellite is approximately _____.

Options :

- 1. 1000 km
- 2. 35900 km approximately
- 3. 500 km
- 4. 100 km

Question Number : 72 Question Id : 15056172 Question Type : MCQ Option Shuffling : No

The altitude of Geosynchronous satellite is approximately _____.

Options :

- 1. 1000 km
- 2. 35900 km approximately
- 3. 500 km
- 4. 100 km

Question Number : 73 Question Id : 15056173 Question Type : MCQ Option Shuffling : No

Which of the following is a correct statement ?

Options :

1. Effective porosity = Specific yield + storativity
2. Effective porosity = Specific yield + specific retention
3. Effective porosity = Specific yield + transmissibility
4. Effective porosity = Specific yield + aquifer yield

Question Number : 73 Question Id : 15056173 Question Type : MCQ Option Shuffling : No

Which of the following is a correct statement ?

Options :

1. Effective porosity = Specific yield + storativity
2. Effective porosity = Specific yield + specific retention
3. Effective porosity = Specific yield + transmissibility
4. Effective porosity = Specific yield + aquifer yield

Question Number : 74 Question Id : 15056174 Question Type : MCQ Option Shuffling : No

The ratio of volume of water, that after saturation can be derived by gravity to its own volume is termed as_____.

Options :

1. Specific yield
2. Specific retention
3. Effective porosity
4. Effective permeability

Question Number : 74 Question Id : 15056174 Question Type : MCQ Option Shuffling : No

The ratio of volume of water, that after saturation can be derived by gravity to its own volume is termed as_____.

Options :

1. Specific yield
2. Specific retention
3. Effective porosity

4. Effective permeability

Question Number : 75 Question Id : 15056175 Question Type : MCQ Option Shuffling : No

A saturated but poorly permeable stratum that impedes groundwater movement and does not yield. Water freely but may constitute an important 'ground water storage zone' is _____.

Options :

1. Aquifer
2. Aquiclude
3. Aquifuge
4. Aquitard

Question Number : 75 Question Id : 15056175 Question Type : MCQ Option Shuffling : No

A saturated but poorly permeable stratum that impedes groundwater movement and does not yield. Water freely but may constitute an important 'ground water storage zone' is _____.

Options :

1. Aquifer
2. Aquiclude
3. Aquifuge
4. Aquitard

Question Number : 76 Question Id : 15056176 Question Type : MCQ Option Shuffling : No

The specific yield represents the volume of water that a rock will yield by gravity, with specific retention the remainder, the sum of the two is equal to _____.

Options :

1. Permeability
2. Hydraulic conductivity
3. Transmissivity
4. Porosity

Question Number : 76 Question Id : 15056176 Question Type : MCQ Option Shuffling : No

The specific yield represents the volume of water that a rock will yield by gravity, with specific retention the remainder, the sum of the two is equal to _____.

Options :

1. Permeability
2. Hydraulic conductivity
3. Transmissivity
4. Porosity

Question Number : 77 Question Id : 15056177 Question Type : MCQ Option Shuffling : No

A confined aquifer is also known as _____.

- A. Artesian aquifer
- B. Pressure aquifer
- C. Perched aquifer
- D. Water table aquifer

Options :

1. 'A' and 'B' are correct statements
2. 'B' and 'C' are correct statements
3. 'C' and 'D' are correct statements
4. Only 'D' is correct statement

Question Number : 77 Question Id : 15056177 Question Type : MCQ Option Shuffling : No

A confined aquifer is also known as _____.

- A. Artesian aquifer
- B. Pressure aquifer
- C. Perched aquifer
- D. Water table aquifer

Options :

1. 'A' and 'B' are correct statements

2. 'B' and 'C' are correct statements
3. 'C' and 'D' are correct statements
4. Only 'D' is correct statement

Question Number : 78 Question Id : 15056178 Question Type : MCQ Option Shuffling : No

The flow rate through porous media is proportional to the head loss and inversely proportional to the length of flow path is known as _____.

Options :

1. Poiseuille's law
2. Hydraulic gradient
3. Reynold's law
4. Darcy's law

Question Number : 78 Question Id : 15056178 Question Type : MCQ Option Shuffling : No

The flow rate through porous media is proportional to the head loss and inversely proportional to the length of flow path is known as _____.

Options :

1. Poiseuille's law
2. Hydraulic gradient
3. Reynold's law
4. Darcy's law

Question Number : 79 Question Id : 15056179 Question Type : MCQ Option Shuffling : No

Horizontal hydraulic conductivity is usually much greater than vertical hydraulic conductivity in _____.

Options :

1. Alluvial aquifers
2. Basaltic aquifers
3. Limestone aquifers

4. Sandstone aquifers

Question Number : 79 Question Id : 15056179 Question Type : MCQ Option Shuffling : No

Horizontal hydraulic conductivity is usually much greater than vertical hydraulic conductivity in _____.

Options :

1. Alluvial aquifers
2. Basaltic aquifers
3. Limestone aquifers
4. Sandstone aquifers

Question Number : 80 Question Id : 15056180 Question Type : MCQ Option Shuffling : No

In the vertical distribution of groundwater, the capillary zone is located at which position ?

Options :

1. Above soil water zone
2. Above zone of saturation
3. Above zone of aeration
4. Below zone of saturation

Question Number : 80 Question Id : 15056180 Question Type : MCQ Option Shuffling : No

In the vertical distribution of groundwater, the capillary zone is located at which position ?

Options :

1. Above soil water zone
2. Above zone of saturation
3. Above zone of aeration
4. Below zone of saturation

Question Number : 81 Question Id : 15056181 Question Type : MCQ Option Shuffling : No

For evaluating direction and rates of groundwater flows, which of the following technique is used ?

Options :

1. Intrusion
2. Extrusion
3. Dispersion
4. Refraction

Question Number : 81 Question Id : 15056181 Question Type : MCQ Option Shuffling : No

For evaluating direction and rates of groundwater flows, which of the following technique is used ?

Options :

1. Intrusion
2. Extrusion
3. Dispersion
4. Refraction

Question Number : 82 Question Id : 15056182 Question Type : MCQ Option Shuffling : No

The well penetrating a confined aquifer is referred as an 'Artesian well'. The word 'Artesian' is of _____ origin.

Options :

1. German
2. Latin
3. Greek
4. French

Question Number : 82 Question Id : 15056182 Question Type : MCQ Option Shuffling : No

The well penetrating a confined aquifer is referred as an 'Artesian well'. The word 'Artesian' is of _____ origin.

Options :

1. German
2. Latin
3. Greek

Question Number : 83 Question Id : 15056183 Question Type : MCQ Option Shuffling : No

_____ is multidisciplinary scientific process, where in a combination of geological, hydro-geological, geophysical, hydrological and quality data are integrated to characterise the quality, quantity and moment of groundwater in aquifer.

- a. Aquifer mapping
- b. Cantour mapping
- c. Spatial mapping
- d. Lithological mapping

Options :

- 1. Only a
- 2. Only b and c
- 3. Only c
- 4. Only d

Question Number : 83 Question Id : 15056183 Question Type : MCQ Option Shuffling : No

_____ is multidisciplinary scientific process, where in a combination of geological, hydro-geological, geophysical, hydrological and quality data are integrated to characterise the quality, quantity and moment of groundwater in aquifer.

- a. Aquifer mapping
- b. Cantour mapping
- c. Spatial mapping
- d. Lithological mapping

Options :

- 1. Only a
- 2. Only b and c
- 3. Only c
- 4. Only d

Question Number : 84 Question Id : 15056184 Question Type : MCQ Option Shuffling : No

Multi-statement : Choose the correct statements regarding laminar and turbulent flow.

- a. Laminar flow is characterized by water particles following regular, non-intersecting paths.
- b. In laminar flow, direction and velocity of groundwater remain consistent in undisturbed state.
- c. Turbulent flow commonly occurs in fractured hard rocks at low depths.
- d. Laminar flow dominates in porous media like sandstones and unconsolidated sediments.

Options :

- 1. Only a, b and d
- 2. Only b, c and d
- 3. Only a and c
- 4. a, b, c and d

Question Number : 84 Question Id : 15056184 Question Type : MCQ Option Shuffling : No

Multi-statement : Choose the correct statements regarding laminar and turbulent flow.

- a. Laminar flow is characterized by water particles following regular, non-intersecting paths.
- b. In laminar flow, direction and velocity of groundwater remain consistent in undisturbed state.
- c. Turbulent flow commonly occurs in fractured hard rocks at low depths.
- d. Laminar flow dominates in porous media like sandstones and unconsolidated sediments.

Options :

- 1. Only a, b and d
- 2. Only b, c and d
- 3. Only a and c

4. a, b, c and d

Question Number : 85 Question Id : 15056185 Question Type : MCQ Option Shuffling : No

Which type of following spring is formed by the permeable water bearing formation overlying a less permeable formation that intersects the groundwater ?

Options :

1. Artesian spring
2. Contact spring
3. Depression spring
4. Impervious rock spring

Question Number : 85 Question Id : 15056185 Question Type : MCQ Option Shuffling : No

Which type of following spring is formed by the permeable water bearing formation overlying a less permeable formation that intersects the groundwater ?

Options :

1. Artesian spring
2. Contact spring
3. Depression spring
4. Impervious rock spring

Question Number : 86 Question Id : 15056186 Question Type : MCQ Option Shuffling : No

The process by which water on the ground surface enters the soil is called as _____.

Options :

1. Percolation
2. Infiltration
3. Seepage
4. Capillarity

Question Number : 86 Question Id : 15056186 Question Type : MCQ Option Shuffling : No

The process by which water on the ground surface enters the soil is called as _____.

Options :

1. Percolation
2. Infiltration
3. Seepage
4. Capillarity

Question Number : 87 Question Id : 15056187 Question Type : MCQ Option Shuffling : No

Which of the following is not a type of stream pattern in watershed ?

Options :

1. Dendritic
2. Radial
3. Pinnate
4. Triangular

Question Number : 87 Question Id : 15056187 Question Type : MCQ Option Shuffling : No

Which of the following is not a type of stream pattern in watershed ?

Options :

1. Dendritic
2. Radial
3. Pinnate
4. Triangular

Question Number : 88 Question Id : 15056188 Question Type : MCQ Option Shuffling : No

A _____ is a land area from which all rainfall would drain by gravity into a common outlet point.

Options :

1. Runoff
2. Hydraulics

3. Catchment

4. Debris

Question Number : 88 Question Id : 15056188 Question Type : MCQ Option Shuffling : No

A _____ is a land area from which all rainfall would drain by gravity into a common outlet point.

Options :

1. Runoff

2. Hydraulics

3. Catchment

4. Debris

Question Number : 89 Question Id : 15056189 Question Type : MCQ Option Shuffling : No

The tendency of the solute to spread out from the path that it would be expected to follow according to the advective hydraulics of the flow system is called _____.

Options :

1. Mechanical advection

2. Hydrodynamic dispersion

3. Hydraulic diffusion

4. Hydrostatic adsorption

Question Number : 89 Question Id : 15056189 Question Type : MCQ Option Shuffling : No

The tendency of the solute to spread out from the path that it would be expected to follow according to the advective hydraulics of the flow system is called _____.

Options :

1. Mechanical advection

2. Hydrodynamic dispersion

3. Hydraulic diffusion

4. Hydrostatic adsorption

Question Number : 90 Question Id : 15056190 Question Type : MCQ Option Shuffling : No

Match List – I and List – II and select the correct option.

List – I

- i. Coefficient of permeability
- ii. Effective porosity
- iii. Rate of pumping
- iv. Water table

List – II

- a. Phreatic surface
- b. Hydraulic conductivity
- c. Specific yield
- d. Trajectory

Options :

- 1. i – c ii – b iii – d iv – a
- 2. i – b ii – a iii – d iv – c
- 3. i – b ii – d iii – a iv – c
- 4. i – b ii – c iii – d iv – a

Question Number : 90 Question Id : 15056190 Question Type : MCQ Option Shuffling : No
Match List – I and List – II and select the correct option.

List – I

- i. Coefficient of permeability
- ii. Effective porosity
- iii. Rate of pumping
- iv. Water table

List – II

- a. Phreatic surface
- b. Hydraulic conductivity
- c. Specific yield
- d. Trajectory

Options :

- 1. i – c ii – b iii – d iv – a
- 2. i – b ii – a iii – d iv – c
- 3. i – b ii – d iii – a iv – c
- 4. i – b ii – c iii – d iv – a

Question Number : 91 Question Id : 15056191 Question Type : MCQ Option Shuffling : No

The pattern of stream channel system within a watershed can be described by drainage density which is calculated using the formula _____.

Options :

- 1. Total number of drainage order/Area of watershed
- 2. Total length of drainage system/Area of watershed

3. Total number of drainage pixels/Area of watershed
4. Higher order of drainage network/Lower order of drainage network

Question Number : 91 Question Id : 15056191 Question Type : MCQ Option Shuffling : No

The pattern of stream channel system within a watershed can be described by drainage density which is calculated using the formula _____.

Options :

1. Total number of drainage order/Area of watershed
2. Total length of drainage system/Area of watershed
3. Total number of drainage pixels/Area of watershed
4. Higher order of drainage network/Lower order of drainage network

Question Number : 92 Question Id : 15056192 Question Type : MCQ Option Shuffling : No

The Union Government of India has constituted the Central Groundwater Authority (CGWA) on _____ Under Section 3(3) of Environment (Protection) Act 1996 with objective to regulate and control development and management of groundwater with jurisdiction in whole of the country.

Options :

1. 24th January 1997
2. 14th January 1997
3. 1st January 1997
4. 4th January 1995

Question Number : 92 Question Id : 15056192 Question Type : MCQ Option Shuffling : No

The Union Government of India has constituted the Central Groundwater Authority (CGWA) on _____ Under Section 3(3) of Environment (Protection) Act 1996 with objective to regulate and control development and management of groundwater with jurisdiction in whole of the country.

Options :

1. 24th January 1997

2. 14th January 1997
3. 1st January 1997
4. 4th January 1995

Question Number : 93 Question Id : 15056193 Question Type : MCQ Option Shuffling : No

The Gondwana sedimentary rock formation in Maharashtra State has covered about _____ percent of total area of State.

Options :

1. 1.55
2. 81.20
3. 1.05
4. 2

Question Number : 93 Question Id : 15056193 Question Type : MCQ Option Shuffling : No

The Gondwana sedimentary rock formation in Maharashtra State has covered about _____ percent of total area of State.

Options :

1. 1.55
2. 81.20
3. 1.05
4. 2

Question Number : 94 Question Id : 15056194 Question Type : MCQ Option Shuffling : No

Select the wrong option from the following (Scale conversion).

Options :

1. 1 hectare = 10,000 sq.m.
2. 1 sq.km. = 247.1 acre
3. 1 sq.km. = 1000 hectares
4. 1 km = 1000 meters

Question Number : 94 Question Id : 15056194 Question Type : MCQ Option Shuffling : No

Select the wrong option from the following (Scale conversion).

Options :

1. 1 hectare = 10,000 sq.m.
2. 1 sq.km. = 247.1 acre
3. 1 sq.km. = 1000 hectares
4. 1 km = 1000 meters

Question Number : 95 Question Id : 15056195 Question Type : MCQ Option Shuffling : No

A measure to improve water quality in a watershed

Options :

1. Increasing fertilizer use
2. Promoting deforestation
3. Implementing waste water treatment plants
4. Using excessive pesticides

Question Number : 95 Question Id : 15056195 Question Type : MCQ Option Shuffling : No

A measure to improve water quality in a watershed

Options :

1. Increasing fertilizer use
2. Promoting deforestation
3. Implementing waste water treatment plants
4. Using excessive pesticides

Question Number : 96 Question Id : 15056196 Question Type : MCQ Option Shuffling : No

Which technique is preferred in the areas where the groundwater is deep ?

Options :

1. Surface recharge technique
2. Subsurface injection technique
3. Basin spread technique

4. Runoff harvesting technique

Question Number : 96 Question Id : 15056196 Question Type : MCQ Option Shuffling : No

Which technique is preferred in the areas where the groundwater is deep ?

Options :

1. Surface recharge technique
2. Subsurface injection technique
3. Basin spread technique
4. Runoff harvesting technique

Question Number : 97 Question Id : 15056197 Question Type : MCQ Option Shuffling : No

Sustainable farming system should include _____

- a. Food component
- b. Fodder component
- c. Water component
- d. Income generation component

Options :

1. Only a
2. Only a and b
3. Only a, b and c
4. a, b, c and d

Question Number : 97 Question Id : 15056197 Question Type : MCQ Option Shuffling : No

Sustainable farming system should include _____

- a. Food component
- b. Fodder component
- c. Water component
- d. Income generation component

Options :

1. Only a

2. Only a and b
3. Only a, b and c
4. a, b, c and d

Question Number : 98 Question Id : 15056198 Question Type : MCQ Option Shuffling : No

Stable isotopes of _____ can be used to determine the contribution of water from rainfall runoff in contrast to the contribution of water that has had significant residence time in the soil and/or groundwater aquifers.

Options :

1. Oxygen and nitrogen
2. Nitrogen and hydrogen
3. Oxygen and hydrogen
4. Oxygen and helium

Question Number : 98 Question Id : 15056198 Question Type : MCQ Option Shuffling : No

Stable isotopes of _____ can be used to determine the contribution of water from rainfall runoff in contrast to the contribution of water that has had significant residence time in the soil and/or groundwater aquifers.

Options :

1. Oxygen and nitrogen
2. Nitrogen and hydrogen
3. Oxygen and hydrogen
4. Oxygen and helium

Question Number : 99 Question Id : 15056199 Question Type : MCQ Option Shuffling : No

Which radio active isotope is used for dating very young groundwater ?

Options :

1. Carbon – 14 (^{14}C)
2. Chlorine – 36 (^{36}Cl)
3. Tritium (^3H)

4. Radium – 226 (^{226}Ra)

Question Number : 99 Question Id : 15056199 Question Type : MCQ Option Shuffling : No

Which radio active isotope is used for dating very young groundwater ?

Options :

1. Carbon – 14 (^{14}C)

2. Chlorine – 36 (^{36}Cl)

3. Tritium (^3H)

4. Radium – 226 (^{226}Ra)

Question Number : 100 Question Id : 150561100 Question Type : MCQ Option Shuffling : No

Natural factors affecting natural water budget of a watershed are _____.

- a. Rainfall and/or snowfall
- b. Temperature and wind variations
- c. Vegetation cover
- d. Soil properties

Options :

1. Only a

2. Only a and b

3. a, b and c

4. a, b, c and d

Question Number : 100 Question Id : 150561100 Question Type : MCQ Option Shuffling : No

Natural factors affecting natural water budget of a watershed are _____.

- a. Rainfall and/or snowfall
- b. Temperature and wind variations
- c. Vegetation cover
- d. Soil properties

Options :

1. Only a

2. Only a and b
3. a, b and c
4. a, b, c and d
