

Maharashtra Public Service Commission Assessment

Subject Name :	Assistant Professor Group A and Lecturer Group B in Commerce Combine Screening Test
Duration :	60
Number of Questions :	100
Total Marks :	200
Display Marks:	Yes
Maximum Instruction Time :	0
Is Section Default? :	No

Question Number : 1 Question Id : 4410092131719 Question Type : MCQ

Why do governments sometimes use non-tariff barriers in international trade?

Options :

1. To promote foreign investment
2. To manage exchange rates
3. To protect domestic industries
4. To increase foreign aid

Question Number : 2 Question Id : 4410092131723 Question Type : MCQ

How does India's Foreign Trade Policy support exporters facing global competition?

Options :

1. Discouraging foreign trade
2. Providing export incentives
3. Restricting foreign investment
4. Increasing import duties

Question Number : 3 Question Id : 4410092131712 Question Type : MCQ

How does an increase in the central bank's policy interest rate typically affect business investment in an economy?

Options :

1. Encourages firms to expand investment projects.
2. Leaves business investment completely unaffected by borrowing cost.
3. Reduces business investment because borrowing becomes more expensive.
4. Increases public sector spending on infrastructure projects.

Question Number : 4 Question Id : 4410092131722 Question Type : MCQ

A government requires imported goods to comply with mandatory safety standards and technical inspections before they can enter the domestic market. This measure is an example of:

Options :

1. Tariff quota
2. Voluntary export restraint
3. Technical regulation
4. Embargo

Question Number : 5 Question Id : 4410092131730 Question Type : MCQ

Which component of the Balance of Payments (BOP) includes unilateral transfers?

Options :

1. Financial account
2. Current account
3. Official reserves account
4. Capital account

Question Number : 6 Question Id : 4410092131718 Question Type : MCQ

According to the theory of comparative advantage, why can two countries benefit from trade even if one country is more productive in producing every good?

Options :

1. The more productive country exports every good to all trading partners.
2. Each country specializes in producing goods with the lowest opportunity cost.
3. Each country avoids trade to achieve complete economic self-sufficiency.
4. Both countries continue producing identical quantities of every good.

Question Number : 7 Question Id : 4410092131721 Question Type : MCQ

When a developing economy imposes tariffs on imported raw materials and intermediate goods, what is a common unintended economic consequence?

Options :

1. Tariffs may increase production costs
2. Tariffs always reduce unemployment
3. Tariffs enhance export growth
4. Tariffs guarantee higher tax revenue

Question Number : 8 Question Id : 4410092131724 Question Type : MCQ

Which of the following measures is used under India's Foreign Trade Policy to help reduce the impact of non-tariff barriers (NTBs) in export markets?

Options :

1. Raising import tariffs
2. Restricting bilateral agreements
3. Negotiating mutual recognition agreements
4. Increasing export subsidies

Question Number : 9 Question Id : 4410092131734 Question Type : MCQ

Which feature distinguishes ASEAN from other regional blocs like the European Union?

Options :

1. Unified judiciary system
2. Flexible cooperation mechanisms
3. Single regional parliament
4. Common monetary authority

Question Number : 10 Question Id : 4410092131736 Question Type : MCQ

A major challenge for South Asian Association for Regional Cooperation (SAARC) is low intra-regional trade. Which strategy could best overcome this?

Options :

1. Increasing border checks
2. Promoting only bilateral agreements
3. Reducing non-tariff barriers
4. Restricting imports regionally

Question Number : 11 Question Id : 4410092284840 Question Type : MCQ

According to the Law of Demand, what happens when the price of a good falls, other things remaining constant?

Options :

1. Demand remains unchanged
2. Supply increases
3. Quantity demanded increases
4. Demand decreases

Question Number : 12 Question Id : 4410092231632 Question Type : MCQ

If an oligopolistic firm expects its competitors to match price cuts but not price increases, what is the likely effect on its pricing decisions?

Options :

1. The firm is reluctant to raise prices
2. The firm ignores competitors' actions
3. The firm is more likely to increase prices
4. The firm will always reduce output

Question Number : 13 Question Id : 4410092284951 Question Type : MCQ

Which cost remains unchanged regardless of the level of output in the short run?

Options :

1. Total Variable Cost
2. Total Cost
3. Average Variable Cost
4. Total Fixed Cost

Question Number : 14 Question Id : 4410092231628 Question Type : MCQ

A firm is choosing between two technologies: Technology A leads to lower average costs at low output, while Technology B is more cost-effective at high output. Which strategy aligns with long-run cost minimization?

Options :

1. Maintaining both technologies simultaneously
2. Switching to Technology B as output increases
3. Using Technology B at all levels
4. Using Technology A at all levels

Question Number : 15 Question Id : 4410092231629 Question Type : MCQ

If firms in an oligopoly collude, what is the most likely impact on market price compared to perfect competition?

Options :

1. Market price will be lower than in perfect competition
2. Market price will be higher than in perfect competition
3. Market price will be equal to equilibrium price
4. Market price will fluctuate unpredictably

Question Number : 16 Question Id : 4410092284888 Question Type : MCQ

When does Average Product (AP) increase?

Options :

1. When Marginal Product (MP) is less than Average Product (AP)
2. When Marginal Product (MP) is negative
3. When Marginal Product (MP) is greater than Average Product (AP)
4. When Marginal Product (MP) is equal to Average Product (AP)

Question Number : 17 Question Id : 4410092284889 Question Type : MCQ

Which law operates in the long run when all factors of production are variable?

Options :

1. Law of Returns to Scale
2. Law of Demand
3. Law of Supply
4. Law of Variable Proportions

Question Number : 18 Question Id : 4410092148802 Question Type : MCQ

Which function of management involves determining organizational objectives and deciding the course of action required to achieve them?

Options :

1. Organizing
2. Staffing
3. Controlling
4. Planning

Question Number : 19 Question Id : 4410092172858 Question Type : MCQ

Which method of job evaluation compares jobs directly to one another in order to establish a ranking?

Options :

1. Point factor method
2. Job ranking method
3. Market pricing method
4. Competency-based method

Question Number : 20 Question Id : 4410092172849 Question Type : MCQ

Which of the following best describes the primary goal of recruitment in human resource management?

Options :

1. To design compensation packages for all staff
2. To evaluate employee performance for promotions
3. To finalize employment contracts with selected candidates
4. To attract a pool of qualified candidates for job vacancies

Question Number : 21 Question Id : 4410092172860 Question Type : MCQ

Why is aligning organizational culture with change initiatives critical for long-term success?

Options :

1. Reduces training costs
2. Supports change-oriented behaviors
3. Increases profits immediately
4. Eliminates performance reviews

Question Number : 22 Question Id : 4410092185073 Question Type : MCQ

Which outcome is most likely when employees consistently suppress their emotions at work?

Options :

1. Increased stress and burnout
2. Greater creativity and innovation
3. Higher job satisfaction
4. Improved communication and trust

Question Number : 23 Question Id : 4410092176176 Question Type : MCQ

An organization wants to boost innovation by linking incentives to team-based project outcomes. Which incentive approach is most appropriate for achieving this strategic goal?

Options :

1. Individual task bonuses
2. Seniority pay increases
3. Team performance incentives
4. Fixed time-based pay

Question Number : 24 Question Id : 4410092176185 Question Type : MCQ

When evaluating the success of a Quality Circle initiative, which metric provides the most comprehensive assessment?

Options :

1. The frequency of management visits to the Circle
2. The total number of meetings held by the Quality Circle
3. The extent to which process improvements are sustained over time
4. The speed at which suggestions are submitted

Question Number : 25 Question Id : 4410092176186 Question Type : MCQ

A company wants to enhance decision-making by integrating real-time sales data with customer feedback. Which characteristic of Management Information Systems is most relevant in this scenario?

Options :

1. Financial transaction processing
2. Historical data storage
3. Payroll automation
4. Timely and relevant information

Question Number : 26 Question Id : 4410092176187 Question Type : MCQ

Which two core functions are integrated in a Management Information System (MIS) to improve organizational efficiency?

Options :

1. Data processing and information dissemination
2. Data collection and product design
3. Recruitment planning and payroll management
4. Market research and advertising

Question Number : 27 Question Id : 4410092185076 Question Type : MCQ

In cross-functional teams, which scenario best illustrates social loafing and its impact on organizational performance?

Options :

1. Members compete for recognition
2. Group rewards increase effort
3. Some members rely on others' efforts
4. Leaders assign clear roles

Question Number : 28 Question Id : 4410092131801 Question Type : MCQ

A renewable energy company markets commercial solar power plants to manufacturing organizations. Since each project differs in capacity, investment, and installation requirements, the firm's sales executives conduct site visits, perform technical assessments, negotiate contracts, and maintain long-term client relationships. Which promotional tool is most critical to the company's marketing strategy?

Options :

1. Advertising
2. Sales promotion
3. Public relations
4. Personal selling

Question Number : 29 Question Id : 4410092131794 Question Type : MCQ

A consumer goods manufacturer appoints an intermediary that purchases products in bulk, assumes ownership of inventory, stores goods in regional warehouses, and supplies smaller quantities to independent retailers. Which channel intermediary is performing this role?

Options :

1. Consumer purchasing finished goods directly
2. Retailer purchasing goods for final sale
3. Wholesaler purchasing goods for resale
4. Agent negotiating sales for commission

Question Number : 30 Question Id : 4410092131814 Question Type : MCQ

A company wants to understand consumers' subconscious emotional responses to a television advertisement without relying on self-reported opinions. Which neuromarketing technique is most appropriate?

Options :

1. Customer satisfaction survey
2. Electroencephalography (EEG)
3. Product test marketing
4. Sales forecasting

Question Number : 31 Question Id : 4410092131800 Question Type : MCQ

Which pricing strategy involves setting a lower initial price to attract a large number of buyers and gain market share quickly?

Options :

1. Price skimming
2. Penetration pricing
3. Premium pricing
4. Psychological pricing

Question Number : 32 Question Id : 4410092131803 Question Type : MCQ

Which promotional tool provides short-term incentives to encourage immediate product purchases?

Options :

1. Public relations
2. Personal selling
3. Sales promotion
4. Direct marketing

Question Number : 33 Question Id : 4410092131806 Question Type : MCQ

A smartphone manufacturer identifies a customer segment that consistently purchases products certified for ethical sourcing and reduced environmental impact, regardless of peer opinions or promotional campaigns. Which factor primarily explains this buying behaviour?

Options :

1. Social class
2. Personal values
3. Reference groups
4. Economic conditions

Question Number : 34 Question Id : 4410092131812 Question Type : MCQ

A smartphone manufacturer observes declining customer satisfaction scores but is uncertain whether the problem arises from product quality, pricing, or after-sales service. Before determining the research design, which step should the marketing researcher undertake first?

Options :

1. Selecting the sampling technique
2. Conducting data analysis
3. Defining the research problem
4. Preparing the final report

Question Number : 35 Question Id : 4410092123986 Question Type : MCQ

Which of the following is NOT a feature of external corporate reconstruction?

Options :

1. Corporate reconstruction may include capital reduction
2. Corporate reconstruction may modify company liabilities
3. Corporate reconstruction does not end the legal existence of the company
4. Corporate reconstruction can involve asset revaluation

Question Number : 36 Question Id : 4410092123996 Question Type : MCQ

A company is evaluating whether to manufacture a component internally or purchase it from an outside supplier. Which costing approach considers only the costs and benefits that differ between the available alternatives, making it the most appropriate for this decision?

Options :

1. Relevant costing
2. Standard costing
3. Contract costing
4. Absorption costing

Question Number : 37 Question Id : 4410092124012 Question Type : MCQ

Which audit is specifically aimed at identifying hazards and ensuring the implementation of safety measures in the workplace?

Options :

1. Safety audit checks hazard controls
2. Management audit reviews management practices
3. Environment audit checks regulations
4. Energy audit focuses on energy use

Question Number : 38 Question Id : 4410092123977 Question Type : MCQ

What is the main purpose of the materiality concept in accounting?

Options :

1. To align costs with earned income
2. To use the same method every year
3. To ensure conservative asset valuation
4. To focus on significant items for reporting

Question Number : 39 Question Id : 4410092124002 Question Type : MCQ

Which of the following best represents a source of funds in funds flow analysis?

Options :

1. Purchase of machinery for cash
2. Depreciation provided on assets
3. Funds raised by issuing debentures
4. Payment of dividend in cash

Question Number : 40 Question Id : 4410092124010 Question Type : MCQ

Which section of the Companies Act, 2013, primarily governs the auditor's report on financial statements in India?

Options :

1. Section 138 of Companies Act, 2013
2. Section 145 of Companies Act, 2013
3. Section 143 of Companies Act, 2013
4. Section 147 of Companies Act, 2013

Question Number : 41 Question Id : 4410092124013 Question Type : MCQ

Which audit would be most relevant for assessing an organization's compliance with statutory environmental regulations and sustainability practices?

Options :

1. Environment audit reviews statutory compliance
2. Systems audit tests software controls
3. Management audit checks internal policies
4. Energy audit measures energy performance

Question Number : 42 Question Id : 4410092123980 Question Type : MCQ

Under Ind AS 101 and IFRS 1, what is the requirement regarding the presentation of comparative financial statements by a first-time adopter?

Options :

1. IFRS 1 requires two comparative periods, whereas Ind AS 101 requires one.
2. Ind AS 101 does not require comparative financial statements.
3. Both standards generally require one comparative period.
4. IFRS 1 permits omission of comparative financial statements.

Question Number : 43 Question Id : 4410092123982 Question Type : MCQ

During the dissolution of a partnership firm, one partner is declared insolvent and is unable to contribute the deficiency in his capital account. In the absence of an agreement to the contrary, how should the deficiency be treated according to the Garner v. Murray rule?

Options :

1. Deficiency is distributed equally among all partners.
2. Deficiency is written off to the goodwill account.
3. Deficiency is borne by all partners in the profit-sharing ratio.
4. Deficiency is borne by the solvent partners in their last agreed capital ratio.

Question Number : 44 Question Id : 4410092123983 Question Type : MCQ

If a partner is insolvent upon dissolution, what is the treatment of their capital deficiency in the absence of agreement?

Options :

1. Share deficiency among solvent partners in capital ratio
2. Share deficiency among all partners equally
3. Transfer the loss to the profit and loss account
4. Ignore the deficiency of the insolvent partner

Question Number : 45 Question Id : 4410092123990 Question Type : MCQ

When a holding company acquires shares in a subsidiary at different times, how should goodwill be computed in consolidated accounts?

Options :

1. Goodwill is calculated at each acquisition date separately
2. Goodwill is calculated using the latest acquisition only
3. Goodwill is calculated by aggregating all acquisitions together
4. Goodwill is calculated at the earliest acquisition date only

Question Number : 46 Question Id : 4410092123992 Question Type : MCQ

In marginal costing, which of the following is considered a relevant cost for decision-making concerning acceptance of a special order?

Options :

1. Non-cash apportioned overhead
2. Variable production cost per unit
3. Allocated fixed overhead per unit
4. Historical sunk cost of machinery

Question Number : 47 Question Id : 4410092124005 Question Type : MCQ

Which of the following is a key feature distinguishing Environmental Accounting from conventional accounting systems?

Options :

1. Regulatory compliance for financial disclosures
2. Application of accrual basis for environmental items
3. Integration of environmental costs into financial reports
4. Double-entry system for pollution control expenses

Question Number : 48 Question Id : 4410092123835 Question Type : MCQ

In the context of the Eurocurrency market, the prefix "Euro" in the term "Eurodollar" signifies that the deposit is:

Options :

1. denominated in euros but held in the United States
2. a US dollar deposit held in a bank outside the United States
3. any European currency deposited within the eurozone
4. a dollar deposit converted into the single European currency

Question Number : 49 Question Id : 4410092124023 Question Type : MCQ

Which of these is generally considered a current asset in working capital management?

Options :

1. Goodwill from acquisitions
2. Plant and equipment purchased
3. Long-term equity investments
4. Accounts receivable from customers

Question Number : 50 Question Id : 4410092123840 Question Type : MCQ

Consider these three statements on the primary uptrend's three phases described by Charles Dow:

Statement (i): The first move stems from accumulation by far-sighted investors.

Statement (ii): The second move stems from distress selling by corporations.

Statement (iii): The third move features widespread reports and rampant speculation.

Which of the statements are correct?

Options :

1. Statements (i) and (ii) only
2. Statements (ii) and (iii) only
3. Statements (i) and (iii) only
4. Statements (i), (ii), and (iii)

Question Number : 51 Question Id : 4410092124024 Question Type : MCQ

Which component is NOT generally considered part of gross working capital?

Options :

1. Inventory held for sale in the next quarter
2. Cash balances in company accounts
3. Long-term investments in securities
4. Trade receivables from customers

Question Number : 52 Question Id : 4410092123836 Question Type : MCQ

Consider the following statements on the relevant statutory provisions regarding Global Depository Receipts in India:

Statement 1: Section 2(44) of the Companies Act, 2013 defines a GDR as created by a foreign depository outside India.

Statement 2: Section 41 of the Companies Act, 2013 authorises a company to issue Global Depository Receipts.

Statement 3: The issue is governed by the Companies (Issue of Global Depository Receipts) Rules, 2014.

Statement 4: A holder of GDRs enjoys voting rights in the issuing company in the same manner as an equity shareholder.

Which of the above are correct?

Options :

1. Statements 2, 3 and 4 only
2. Statements 1, 2 and 4 only
3. Statements 1, 2 and 3 only
4. Statements 1, 3 and 4 only

Question Number : 53 Question Id : 4410092123838 Question Type : MCQ

While fundamental and technical analysis rely on completely different operational methodologies, what synthesized, overarching objective fundamentally unifies both approaches for a rational market participant?

Options :

1. Estimating a security's true intrinsic value.
2. Guiding a sound buy-or-sell decision.
3. Predicting short-term market price reversals.
4. Reflecting all information in price.

Question Number : 54 Question Id : 4410092124016 Question Type : MCQ

Which among the following is considered an internal source of business finance for a company?

Options :

1. Retained earnings from past business operations
2. Term loans obtained from a bank
3. Debentures issued to institutional investors
4. Commercial paper issued in money markets

Question Number : 55 Question Id : 4410092124022 Question Type : MCQ

A company uses the internal rate of return (IRR) method and the accounting rate of return (ARR) method for capital budgeting. Which scenario could lead to conflicting project rankings?

Options :

1. Projects with differing cash flow timing profiles
2. Projects with equal book value depreciation
3. Projects with constant cash inflows
4. Projects with identical cash flow timing profiles

Question Number : 56 Question Id : 4410092123842 Question Type : MCQ

Restructuring a pool of illiquid loans into newly designed tradable instruments with customized risk-return profiles for different investor classes best exemplifies:

Options :

1. Liquidity provision services
2. Payment mechanism services
3. Financial engineering services
4. Funds intermediation services

Question Number : 57 Question Id : 4410092123866 Question Type : MCQ

A corporate treasurer must remit exactly ten lakh rupees instantly to a supplier during a public bank holiday. Which internet banking facility strictly facilitates this immediate high-value transfer?

Options :

1. Immediate Payment Service mobile transfer
2. Unified Payments Interface corporate gateway
3. Real Time Gross Settlement system
4. National Electronic Funds Transfer mode

Question Number : 58 Question Id : 4410092123843 Question Type : MCQ

Both commercial banks and NBFCs extend credit, yet only banks are described as "creators" rather than mere "purveyors" of credit. The defining basis for this distinction is that a bank's lending:

Options :

1. Draws on a larger reserve base than NBFCs
2. Generates a fresh deposit liability counted as money
3. Must meet statutory priority-sector lending allocation targets
4. Is insured under a deposit guarantee scheme

Question Number : 59 Question Id : 4410092123852 Question Type : MCQ

Evaluate the following statements regarding the capital position and risk management frameworks of Indian banks:

Statement I: The Capital to Risk Weighted Assets Ratio (CRAR) rose to 17.36% in March 2025.

Statement II: Common Equity Tier 1 (CET-1) represents the lowest quality capital a bank can hold.

Statement III: The Basel III leverage ratio prescribes a minimum of 3%, which the RBI has set higher at 3.5% for most banks and 4% for Domestic Systemically Important Banks.

Statement IV: The leverage ratio measures the proportion of a bank's Tier 2 capital to its total assets.

Which of the statements above are correct?

Options :

1. Only statements I and III are correct.
2. Only statements II and IV are correct.
3. Only statements I and IV are correct.
4. Only statements II and III are correct.

Question Number : 60 Question Id : 4410092123864 Question Type : MCQ

In context of the RBI Financial Inclusion Index, considering both the assigned weight and the number of constituent indicators together, which sub-index is the single most dominant component of the FI-Index?

Options :

1. Access sub-index
2. Usage sub-index
3. Quality sub-index
4. Digital sub-index

Question Number : 61 Question Id : 4410092123870 Question Type : MCQ

When an insurance firm transitions to a fully centralised, wide-area network data management system, which vulnerability represents the principal availability risk introduced?

Options :

1. A single point of failure causing total countrywide operational outage.
2. Concentration of the entire attack surface, so one breach exposes all policyholder data nationally.
3. WAN latency and bandwidth contention degrading branch transaction throughput at scale.
4. Centralised schema changes propagating data-integrity errors across all regions at once.

Question Number : 62 Question Id : 4410092123845 Question Type : MCQ

An efficient financial system continuously strives to achieve the optimum allocation of risk-bearing by trading various financial risks. In the context of risk management services and modern financial engineering, what is the fundamental mechanism through which derivatives optimize risk allocation among participants?

Options :

1. Eliminating every systemic market risk that participants collectively face.
2. Transferring risk from hedgers toward parties willing to bear it.
3. Guaranteeing fixed, predetermined returns to all primary market investors.
4. Restricting permissible trading exclusively to sovereign government securities.

Question Number : 63 Question Id : 4410092123851 Question Type : MCQ

The Reserve Bank of India pursues price stability and adequate credit flow for growth using a single control over the supply and cost of money. Evaluate the following statements about this dual mandate:

Statement I. Pursuing both goals with one instrument set creates an inherent trade-off.

Statement II. Tightening money against inflation can curtail credit to productive sectors.

Statement III. Expanding growth credit dependably lowers the general price level.

Statement IV. Since the two goals never conflict, instrument sequencing is unnecessary.

Which of the above are correct?

Options :

1. Statements I and II only
2. Statements I, II, and III only
3. Statements II, III, and IV only
4. Statements I, III, and IV only

Question Number : 64 Question Id : 4410092123856 Question Type : MCQ

Identify the odd one out regarding the permitted regulatory parameters and limits for eligible entities executing short sales in Government Securities:

Options :

1. For liquid securities, 2% of the total outstanding stock of each security or ₹500 crore, whichever is higher.
2. For other than Liquid securities, 1% of the total outstanding stock of each security or ₹250 crore, whichever is higher.
3. Short sales shall be covered within a period of 120 days from the date of the transaction.
4. Gilt Account Holders are not permitted to undertake short sale transactions.

Question Number : 65 Question Id : 4410092123862 Question Type : MCQ

The Top Layer of the Scale Based Regulation (SBR) framework is designed to remain empty under normal conditions. An NBFC is moved into it when the Reserve Bank forms the opinion that:

Options :

1. there has been a substantial increase in the potential systemic risk posed by a specific NBFC in the Upper Layer
2. the asset size of the NBFC has consistently crossed the prescribed ceiling fixed for the Upper Layer category
3. the NBFC has repeatedly breached the minimum net owned fund requirement specified for its layer
4. the gross non-performing asset ratio of the NBFC has exceeded the prudential ceiling for two consecutive years

Question Number : 66 Question Id : 4410092123865 Question Type : MCQ

Assess the validity of the following propositions concerning the RBI's amended jurisdiction over banking institutions and select the option.

Statement I: The RBI can supersede a cooperative bank's Board of Directors in consultation with the concerned Registrar.

Statement II: Cooperative banks can lawfully grant unsecured director loans.

Statement III: Amalgamation schemes strictly require imposing a regulatory moratorium.

Statement IV: Agricultural credit societies remain outside new RBI supervision.

Options :

1. Only Statements I and IV are correct.
2. Only Statements II and III are correct.
3. Only Statements I and II are correct.
4. Only Statements III and IV are correct.

Question Number : 67 Question Id : 4410092123868 Question Type : MCQ

A large corporate needs to combine high-value treasury settlements with frequent low-value vendor disbursements. Considering settlement mechanism and value-band suitability under current RBI/NPCI norms, the most appropriate combination is:

Options :

1. RTGS for high-value transfers and NEFT for low-value vendor payments
2. NEFT for high-value transfers and RTGS for low-value vendor payments
3. IMPS for high-value transfers and UPI for low-value vendor payments
4. UPI for high-value transfers and RTGS for low-value vendor payments

Question Number : 68 Question Id : 4410092123878 Question Type : MCQ

If a tax cannot be shifted to another person, which category does it belong to according to basic tax concepts?

Options :

1. Direct Tax
2. Customs Duty
3. Indirect Tax
4. GST

Question Number : 69 Question Id : 4410092123894 Question Type : MCQ

Which mechanism is commonly used to mitigate the effects of double taxation between countries?

Options :

1. Tax penalties imposed by home country
2. Higher withholding tax rates
3. Tax agreements or treaties
4. Domestic tax audits

Question Number : 70 Question Id : 4410092123886 Question Type : MCQ

Which of the following statements best describes the exemption limit for Hostel Expenditure Allowance under the head Salary Income as per Income Tax Act, 1961 for the Assessment Year 2025-26?

Options :

1. Exempt up to INR 300 per month per child, maximum 2 children
2. Exempt up to INR 100 per month per child, maximum 2 children
3. Exempt only for a single child at INR 300 per month
4. Fully exempt regardless of number of children

Question Number : 71 Question Id : 4410092123895 Question Type : MCQ

In the context of bilateral relief under a Double Taxation Avoidance Agreement, what does the exemption method involve?

Options :

1. Income is taxed in both countries and credit is given
2. Income is taxed only in the country of residence
3. Income is taxed only in the country of source
4. Income is taxed in one country and exempted in the other

Question Number : 72 Question Id : 4410092123904 Question Type : MCQ

What ethical perspective does the context provide regarding tax evasion?

Options :

1. It is only wrong if it causes significant financial loss to the government
2. It is both legally and morally wrong, acting as a cancer in society
3. It is only a minor violation if done in small amounts
4. It is morally acceptable if not detected by authorities

Question Number : 73 Question Id : 4410092123910 Question Type : MCQ

Under the Income Tax Act, 1961, when tax is deducted at source under applicable TDS provisions, it is generally deducted at which point?

Options :

1. Only after completion of assessment proceedings
2. Only when demanded by the Income Tax Department
3. At the time of credit or payment of specified income, whichever occurs earlier
4. Only after the end of the financial year

Question Number : 74 Question Id : 4410092123885 Question Type : MCQ

Partial integration of agricultural and non-agricultural income under the Income Tax Act, 1961, applies to which of the following entities?

Options :

1. Sole proprietors, partnership firms, companies
2. Individuals, companies, trusts, NGOs
3. Individuals, HUF, AOP, BOI, artificial juridical person
4. Only individuals and HUF

Question Number : 75 Question Id : 4410092123890 Question Type : MCQ

Which of the following individuals is eligible to claim deduction under Section 80TTB of the Income Tax Act, 1961, for the Assessment Year 2025-26?

Options :

1. A non-resident individual aged 60 years or above having income of atleast ₹10,00,000 in the financial year
2. Any individual opting for the concessional tax regime under section 115BAC with an income of atleast ₹10,00,000
3. A resident individual aged 60 years or above not opting for the concessional tax regime under section 115BAC
4. An individual aged 55 years, having income less than ₹5,00,000 and not opting for the concessional tax regime under section 115BAC

Question Number : 76 Question Id : 4410092123893 Question Type : MCQ

Under Section 10(32) of the Income Tax Act, 1961, what exemption is available to a parent in whose hands a minor's income is clubbed?

Options :

1. A full exemption of the minor's income
2. An exemption up to ₹1,500 per child
3. An exemption up to ₹10,000 per family
4. An exemption of 10% of the minor's income

Question Number : 77 Question Id : 4410092123897 Question Type : MCQ

Which document is essential for a non-resident assessee to claim the benefit of a double taxation agreement under Section 90(4) of the Income Tax Act, 1961?

Options :

1. Passport of the assessee
2. Tax Residency Certificate issued by their country of residence
3. Income statement from the foreign country
4. Business license from their home country

Question Number : 78 Question Id : 4410092123899 Question Type : MCQ

What does the arm's length price in transfer pricing most closely refer to?

Options :

1. Price fixed by government authorities
2. Price determined by internal management policies
3. Historical cost of production of the goods
4. Fair price charged in an uncontrolled transaction

Question Number : 79 Question Id : 4410092123908 Question Type : MCQ

Which of the following is a primary non-cost consideration when deciding whether to shut down or continue operations?

Options :

1. Capacity utilization
2. Lack of funding
3. Variable production cost versus purchase price
4. Labour issues in factories

Question Number : 80 Question Id : 4410092123914 Question Type : MCQ

An assessee pays 15% of advance tax as per the Income Tax Act, 1961, by June 15 and an additional 30% by September 15. What is the minimum percentage required to be cumulatively paid by December 15?

Options :

1. 100% of the advance tax due as reduced by the amount paid in earlier instalments
2. 45% of the advance tax due as reduced by the amount paid in earlier instalments
3. 60% of the advance tax due as reduced by the amount paid in earlier instalments
4. 75% of the advance tax due as reduced by the amount paid in earlier instalments

Question Number : 81 Question Id : 4410092123917 Question Type : MCQ

Who acts as the Chairman of the Goods and Services Tax Council as per Article 279A of the Constitution?

Options :

1. Union Finance Minister
2. Minister of State (Revenue)
3. State Finance Minister
4. Central Board of Direct Taxes Chairman

Question Number : 82 Question Id : 4410092123921 Question Type : MCQ

A company sends goods for job work from Maharashtra to Gujarat, valued at ₹30,000. Which statement is correct regarding e-way bill requirement under the GST Laws?

Options :

1. E-way bill must be generated regardless of the value
2. E-way bill is required only if transported by a registered transporter
3. E-way bill is optional for interstate job work below threshold
4. E-way bill is not required as value is below ₹50,000

Question Number : 83 Question Id : 4410092096209 Question Type : MCQ

Which of the following defines 'free consent' under the Indian Contract Act, 1872?

Options :

1. Consent given voluntarily by both parties to a contract
2. Consent given by parties when they agree Consensus ad idem
3. Consent obtained through persuasion by one party
4. Consent given only after payment of consideration

Question Number : 84 Question Id : 4410092096208 Question Type : MCQ

Which scenario demonstrates a party lacking capacity to contract under the Indian Contract Act, 1872?

Options :

1. A minor misrepresents age and enters into a loan contract
2. An intoxicated individual agrees to purchase land
3. A person of unsound mind signs a property sale agreement
4. A person declared insolvent enters into a partnership

Question Number : 85 Question Id : 4410092096213 Question Type : MCQ

Which of the following scenarios demonstrates a valid quasi-contractual obligation under the Indian Contract Act, 1872?

Options :

1. C performs services for D as per a valid contract
2. A supplies goods by mistake to B, and B consumes
3. A intentionally gifts goods to B, who accepts
4. E pays F under a valid contract without dispute

Question Number : 86 Question Id : 4410092096221 Question Type : MCQ

Under the Sale of Goods Act, 1930, if the seller wrongfully refuses to deliver the goods, which right can the buyer exercise?

Options :

1. The right to demand specific performance immediately
2. The right to claim interest on the price paid
3. The right to sue the seller for damages for non-delivery
4. The right to reject the goods upon delivery

Question Number : 87 Question Id : 4410092096226 Question Type : MCQ

A company wishes to transfer a negotiable instrument to another entity without endorsing it but by merely delivering possession. Under the Negotiable Instruments Act, 1881, which method of transfer is being applied, and what is a key legal implication of this action?

Options :

1. Negotiation by endorsement and delivery; the transferee cannot sue in their own name
2. Delivery with notice; the transferee gains the right to sue but only with the transferor's consent
3. Negotiation by delivery; the transferee obtains the right to sue in their own name
4. Assignment; the transferee becomes a holder in due course and acquires a superior title

Question Number : 88 Question Id : 4410092096229 Question Type : MCQ

Which of the following distinguishes a public company from a private company under the Companies Act, 2013?

Options :

1. Public company: minimum 3 directors; private company: minimum 2
2. A public company must have at least as many directors as a private company
3. Foreign ownership is allowed in both public and private companies
4. Public companies can offer shares publicly; private companies cannot

Question Number : 89 Question Id : 4410092096232 Question Type : MCQ

Which of the following scenarios demonstrates compliance with the procedural requirements under the Companies Act, 2013, for the valid incorporation of a private company in India?

Options :

1. Filing Memorandum and Articles with Registrar but not paying fees
2. Registering with tax authorities before approval by Registrar
3. Submission of Memorandum and Articles, by paying fees
4. Obtaining Certificate of Incorporation without submitting documents

Question Number : 90 Question Id : 4410092096237 Question Type : MCQ

What is one of the main objectives of the Information Technology Act, 2000?

Options :

1. To standardize software exports from India
2. To regulate contracts not involving digital media
3. To provide legal recognition to electronic records
4. To promote hardware manufacturing in India

Question Number : 91 Question Id : 4410092096238 Question Type : MCQ

Which of the following describes a primary objective of the Information Technology Act' 2000?

Options :

1. To oversee traditional banking and financial transactions
2. To regulate all physical contract agreements in commerce
3. To control all forms of intellectual property in the country
4. To facilitate electronic governance and legal recognition of electronic records

Question Number : 92 Question Id : 4410092096239 Question Type : MCQ

Which scenario demonstrates the application of the Information Technology Act, 2000, in addressing challenges related to electronic commerce and digital signatures in India?

Options :

1. A company uses digital signatures to authenticate online contracts,
2. An organization ignores cybercrime reporting protocols
3. A business maintains only paper-based contracts,
4. A company restricts employee internet access

Question Number : 93 Question Id : 4410092143744 Question Type : MCQ

For a dataset consisting of exactly two distinct positive observations, which mathematical relationship definitively links the Arithmetic Mean (AM), Harmonic Mean (HM), and Geometric Mean (GM)?

Options :

1. The product of the AM and HM equals the squared geometric mean
2. The quotient of the AM and HM equals the squared geometric mean
3. The difference of the AM and HM equals the squared geometric mean
4. The summation of the AM and HM equals the squared geometric mean

Question Number : 94 Question Id : 4410092143748 Question Type : MCQ

Consider a continuous probability distribution where the probability density function $f(x)$ is perfectly symmetric strictly between its first and third quartiles, but possesses a heavily elongated, asymmetric right tail extending toward positive infinity. In this scenario, how will Bowley's coefficient of skewness (S_Q) compare to the moment-based measure of skewness (γ_1)?

Options :

1. Both S_Q and γ_1 will indicate strong positive skewness.
2. S_Q will evaluate to zero, while γ_1 will indicate positive skewness.
3. S_Q will indicate positive skewness, while γ_1 will evaluate to zero.
4. Both S_Q and γ_1 will evaluate to zero due to the central symmetry.

Question Number : 95 Question Id : 4410092143750 Question Type : MCQ

Which statement about Bayes' Theorem is correct?

Options :

1. It updates prior probabilities with new evidence to calculate a posterior probability.
2. It strictly calculates classical frequency ratios without incorporating prior beliefs.
3. It completely ignores previous data and relies exclusively on new outcomes.
4. It applies exclusively to events that possess strictly independent probabilities.

Question Number : 96 Question Id : 4410092143754 Question Type : MCQ

When designing a national survey across a population characterized by extreme inter-domain variance and deep geographical divides, which methodological approach mathematically guarantees proportional representation while actively minimizing the overall standard error of the estimate?

Options :

1. Utilizing a proportional stratified probability design.
2. Utilizing a comprehensive clustered probability design.
3. Utilizing a deterministic systematic probability design
4. Utilizing an unpartitioned uniform probability design.

Question Number : 97 Question Id : 4410092143758 Question Type : MCQ

An environmental scientist compiles a dataset containing the exact measured volume of annual precipitation, sequentially structured according to each specific year of observation. What fundamentally dictates the statistical classification of this data framework?

Options :

1. Temporal periods dictate the primary classification axis.
2. Measured volumes dictate the primary classification axis.
3. Spatial regions dictate the primary classification axis.
4. Discrete factors dictate the primary classification axis.

Question Number : 98 Question Id : 4410092143757 Question Type : MCQ

A postgraduate researcher investigates digital banking adoption by extracting and analyzing a subset of anonymized user transaction records originally aggregated by a financial institution for internal regulatory compliance. Methodologically, how is this data formally classified?

Options :

1. Classified as primary data.
2. Classified as secondary data.
3. Classified as tertiary data.
4. Classified as internal data.

Question Number : 99 Question Id : 4410092143764 Question Type : MCQ

When using ANOVA, which of the following is a post hoc test used to determine which groups differ?

Options :

1. Bartlett's test for equal variances
2. Logistic regression analysis
3. Tukey's Honestly Significant Difference test
4. Two-sample t-test

Question Number : 100 Question Id : 4410092143767 Question Type : MCQ

In psychometric survey analysis utilizing ordinal Likert-type scales, what theoretical property makes Spearman's correlation statistically preferable to Pearson's correlation?

Options :

1. Spearman's test maximizes linear covariance, ensuring significantly greater statistical power for highly skewed empirical survey distributions.
2. Spearman's test evaluates strictly monotonic associations by using ranked data rather than assuming bivariate normality.
3. Spearman's test perfectly normalizes residual variance, ensuring that empirical survey responses inherently form standard normal distributions.
4. Spearman's test minimizes necessary degrees of freedom, guaranteeing strict mathematical convergence across all ordinal survey responses.
